SUBJECT INDEX

Absorption and luminescence spectra of poly(N,N′-bis-phenoxyphenyl)pyromellitimide, the initial polyamic acid and some model compounds 5, 1264

Accelerators, synthesis and mechanism of the action of phosporus-containing rubber vulcanization - 1, 19

Acetaldehyde, effect of the nature of the solvent on the catalytic stage in the condensation of phenol with - 12, 2958

Acetic acid, flow birefringence and viscosity of chitosan solutions in - of various ionic strengths 7, 1694

Acidic-basic properties, study of - of aminoazo-compounds obtained from poly-*p*-aminophenylacetylene 2, 457

Acidic-basic properties, study of - of polymeric hydroxyazophenyl acetylene dyes with the help of electronic absorption spectra 2, 452

Acidic catalyst, kinetics of homopolycondensation of a bisecondary aromatic glycol in the presence of an - 5, 1246

Acids, study of polycondensation of furfuryl alcohol with formaldehyde catalyzed by - 1, 228

Acoustic and viscoelastic relaxation in solutions of some polymers 5, 1132

Acrylamide, electrochemical preparation of polymer films on metals from aqueous solutions of - and formaldehyde 8, 1980

Acrylamide, homogenization of polypropylene–polyethylene mixtures under high pressure and in shear deformation in the presence of - 1, 174

Acrylic acid, role of complex formation during the homo- and copolymerization of methacrylonitrile and - in dimethyl sulphoxide–water solutions 7, 1730

Acrylonitrile, chain propagation and the reactivity of - and isoprene during radical copolymerization 12, 2953

Acrylonitrile, chemical inhomogeneity of terpolymers of styrene with - and methyl methacrylate 6, 1337

Acrylonitrile, molecular characteristics of triple copolymers of styrene with - and methylmethacrylate in dilute solutions 12, 2889

Acrylonitrile, method of analysing gel-chromatographic curves of polymers and study of the mechanism of radical copolymerization of isoprene with - 7, 1805

Acrylonitrile, the behaviour of macromolecules of styrene– - methyl methacrylate terpolymers in solutions 9, 2276

Acrylonitrile, the relative roles of physical and chemical deactivation of propagating chains during the anionic polymerization of - in a hydrocarbon medium 9, 2285

Acrylate, the structural features of smectic ordering in polymers with an - and methacrylate main chain 3, 614

Active centres, molecular weight distribution of the products of regulated polymerization on catalysts containing two types of mutually transforming - 2, 303

Active fillers, influence of the dispersion of - on the fine structure of the relaxation spectra of elastomers 4, 923

Adhesion, study of the - of polyethylene to metals at cryogenic temperatures 2, 412

Adhesion bonds, mechanism of formation of - between an elastomer and phenol-formaldehyde oligomer **2,** 433
Adhesion strength, study of comparative characteristics of - of epoxide resins based on sulphone and bis-phenol A **8,** 2066
Adhesive compounds, analytical electron microscopy in studying - **10,** 2579
Adsorption, method for determining the rate of solution, coefficient of diffusion and - of solid low-molecular weight components in filled elastomers **10,** 2589
Adsorption of oligomers containing functional groups on a porous adsorbent **6,** 1414
Adsorption of proteins in the processes of interaction of polymers with blood and model solutions **3,** 523
Adsorption chromatography, analysis of molecular weight distribution of bis-phenol epoxide resins by liquid - **1,** 247
Aerosil, structure and properties of polybutyl methacrylate obtained by polymerization in the presence of - **6,** 1484
Areosil, the effect of an - on melting and crystallization of unvulcanized blends and vulcanizates based on the siloxane rubber, SKTFV **3,** 603
Ageing and stabilization of polymers, VI Conference on the problem of - **12,** 3064
Ageing of polymers, XV Colloquium of countries along the Danube on natural and artificial - **4,** 1034
Alcohols, a ^{19}F NMR study of the direction of opening of the epoxide ring in the uncatalysed reaction of α-oxides with phenols and - **7,** 1653
Aliphatic and hetero-aromatic amines, study of the formation of epoxy - containing oligomers and network polymers. Model reactions of phenols with glycidyl ethers catalyzed by - **4,** 1002
Aliphatic group, influence of length of the - on the character of liquid-crystalline orderliness in polymers with phenol benzoate side groups **4,** 789
Aliphatic mercaptan, chain transfer reactions by - in the high-temperature polymerization of methylmethacrylate **10,** 2414
Aliphatic polyamides, use of accessibility as determined by H→D isotope exchange for the study of physico-chemical properties of - **11,** 2813
Alkaline media, kinetics and mechanism of decay of compounds containing carbonate bonds in - **2,** 373
Alkaline medium, features of the oxidation of oligohydroxyarylenes in an - **4,** 903
Alkylation, study of the molecular weight distribution and structure of oligomers prepared by - of toluene with epichlorochydrin **1,** 129
Alkyl-aluminium-magnesium complexes, the use of organomagnesium compounds and - in a Ziegler catalyst for the synthesis of *cis*-1,4-polyisoprene **10,** 2442
Allylcyclohexyl ethers, kinetics of alternating copolymerization of allylphenyl and - with maleic anhydride **11,** 2806
Allyl phenyl and allyl cyclohexyl ethers, kinetics of alternating copolymerization of - with maleic anhydride **11,** 2806
Amide solvents, copolycondensation of diamines, dicarboxylic acid chlorides and aromatic disulphonylchlorides in - **8,** 1864
Amidization, intermacromolecular - in dilute aqueous solution of a polyelectrolytic complex of polyacrylic acid and linear polyethylene imine **7,** 1771
Amine and hydrazide groups, polarographic study of the reactivity of the - in the phthalation reaction **4,** 844
Amine catalysts, study of epichlorohydrin addition to the copolymer of *p*-benzoquinone and styrene in the presence of - **1,** 161

Aminoazo-compounds, study of acidic-basic properties of - obtained from poly-*p*-aminophenylacetylene 2, 457
Aminoesters, the polymerization of - and their salts in various solvents 1, 106
Aminolysis, secondary reactions of - and ring formation taking place with the formation of crosslinked polymers from diglycidyl ethers of dicarboxylic acids and aromatic diamines 2, 479
Ammonia, effect of chemical structure of aromatic polyamides on sorption capacity towards - 9, 2236
Amorphous-crystalline phase separation processes, features of liquid and - in block copolymers and in mixtures with variable molecular weights 2, 395
Amorphous-crystalline polymers, effect of tensile stress on the molecular mobility of oriented - 11, 2845
Anhydride groups, the synthesis of heterofunctional polymers with peroxide and - 5, 1152
Anionic copolymerization, some aspects of the - of cyclic sulphides with hexamethyl-cyclotrisiloxane 12, 2971
Anionic polymerization, miscoscopic structure of oligoesteracrylate networks obtained in a medium of different solvents by the mechanism of - 10, 2395
Anionic non-equilibrium copolymerization of hexaorganylcyclotrisiloxanes with polar substituents at the silicon atom 12, 2899
Anionic polymerization, the relative roles of physical and chemical deactivation of propagating chains during the - of acrylonitrile in a hydrocarbon medium 9, 2285
Anisotropy, effect of - of high-density polyethylene on special features of its behaviour on uniaxial elongation 11, 2832
Anisotropy, method of studying diamagnetic - of polypropylene fibres 7, 1801
Annealing, study of recrystallization processes during isometric - of oriented polytetrafluoroethylene 10, 2554
Annealing, the effect of - on the mechanism of plastic deformation of oriented polypropylene 3, 692
Anthracene dimers, on the photochemical decay of - in a study of microvoids in solid polymethyl methacrylate 10, 2520
Antioxidants, concentration dependence of the light-protective effectiveness of - in polymers 6, 1400
Antioxidants, kinetics of oxidative polymerization inhibited by - . Limiting concentrations of antioxidants, critical rate of initiation and critical concentration of monomer 2, 282
Antioxidants, kinetics of the thermooxidative degradation of *cis*-1,4-polyisoprene in bulk in the presence of phenol - 5, 1198
Aqueous medium, mechanism of initiation of polymerization of vinyl monomers by manganese (III) tris-acetyl acetonate–carboxylic acid systems in an - 5, 1074
Aqueous solution, intermacromolecular amidization in dilute - of a polyelectrolyte complex of polyacrylic acid and linear polyethylene imine 7, 1771
Aqueous solutions, electrochemcal preparation of polymer films on metals from - of acrylamide and formaldehyde 8, 1980
Aqueous solutions, experimental study of mass transfer of some model and drug substances across microporous polymer membranes in - 4, 830
Aromatic diamines, secondary reactions of aminolysis and ring formation taking place with the formation of crosslinked polymers from diglycidyl ethers of dicarboxylic acids and - 2, 479
Aromatic diamines, the kinetics of secondary reaction in a network polymer based on - and aromatic epoxides 9, 2320

Aromatic disulphonylchlorides, copolycondensation of diamines, dicarboxylic acid chlorides and - in amide solvents 8, 1864
Aromatic epoxides, the kinetics of secondary reaction in a network polymer based on aromatic diamines and - 9, 2320
Aromatic fluorine-containing copolyamides, synthesis and study of the properties of - 2, 328
Aromatic glycol, kinetics of homopolycondensation of a bisecondary - in the presence of an acidic catalyst 5, 1246
Aromatic polyamide, concerning the conformation of an - in an organic solvent and in concentrated sulphuric acid according to flow-birefringence data 8, 1906
Aromatic polyamides, effect of chemical structure of - on sorption capacity towards ammonia 9, 2236
Aromatic polyamides, thermooxidative degradation of compositions based on - 6, 1475
Aromatic polyimides, radiation impulse induced electrical conductivity of - with dianhydride components of differing structure 1, 113
Aromatic polysulphone, molecular and hydrodynamic characteristics of an - obtained by electrophilic substitution 10, 2375
Attenuated total internal reflection, evaluation of the type of grafting and composition of polyethylene graft copolymers by the combination of IR spectroscopy and - 5, 1283

Benzene, on the polymerization mechanism of 10-vinylphenothiazine in the presence of tetrahalobenzoquinones in - 9, 2203
Benzene, on the polymerization of fluorine substituted derivatives of - in a glow discharge 5, 1215
Benzophenone, photopolymerization of butyl methacrylate in the presence of - sensitized by 2-N,N-dimethylaminophenazine 5, 1186
***p*-Benzoquinone,** study of epichlorohydrin addition to the copolymer of - and styrene in the presence of amine catalysts 1, 161
Benzoyl peroxide, kinetic regularities of decomposition of - in polystyrene medium 6, 1504
Benzoyl peroxide, mechanism of the inhibition of polymerization of vinyl monomers initiated by - by stable nitroxide radicals 10, 2497
Bifunctional compounds, thermostabilization of polyvinylchloride by - 10, 2504
1,4-bis-(*m*-acetylamino phenyl) butydiyne, the solid phase polymerization of - and the optical and photooptical properties of the polymer 9, 2290
Bis-π-allylnickel bromide, study of polymerization of 1,1-dimethylallene by the action of - 9, 2265
1,7-bis-(dimethylsilylmethyl)-*m*-carborane, synthesis and properties of polyorganosiloxanes containing - units 6, 1454
Bis-phenol A, study of comparative characteristics of adhesion strength of epoxide resins based on sulphone and - 8, 2066
Bis-phenol epoxide resins, analysis of molecular weight distribution of - by liquid adsorption chromatography 1, 247
Blends, the effect of an aerosil on melting and crystallization of unvulcanized - and vulcanizates based on the siloxane rubber, SKTFV 3, 603
Block-copolymers, investigation of polystyrene–polymethylmethacrylate - by high-efficiency gel-permeation chromatography 12, 2977
Block-copolymers, investigation of polystyrene–polybutadiene - by gel-permeation chromatography and by ozonolysis 12, 2986
Block-copolymers, properties of solutions of poly-(arylate-arylene sulphonodixe) - 7, 1778

Boron-siloxane polymers, study of the molecular weight distribution of - by gel permeation chromatography **1,** 1
Boundary layer, influence of the defective - on nucleation during crystallization of oriented polymer melts **2,** 294
Boundary layer, on refractometric determination of the properties of - of elastomers **9,** 2197
Breakdown mechanism of stressed polypropylene in oxidizing medium. Structural effects **10,** 2542
Butadiene, multiplicity of relaxation transitions in - –methylstyrene copolymers **2,** 358
Butadiene, polymerization in the - –styrene system under the action of organolithium active sites in the presence of subcatalytic quantities of tetramethylenediamine **10,** 2464
Butadiene, rheological properties of materials based on polystyrene modified with block copolymers of - and styrene under conditions of shear and uniaxial streiching **1,** 181
Butadiene, study of photoelastic properties of films of styrene– - ternary block copolymers **7,** 1766
Butadiene-methylstyrene copolymer, the effect of the filler on relaxational transitions in - **3,** 595
Butyl chloride glassy matrix, radiation-induced ionic polymerization at low temperatures. Cyclopentadiene in a - **4,** 953
Butyl methacrylate, photopolymerization of - in the presence of benzophenone sensitized by 2-N,N-dimethylaminophenazine **5,** 1186
Butyl methacrylate, rheological study of the mechanism of gel-effect in radical polymerization of - in bulk **11,** 2826
Butyl rubber, change in the molecular characteristics of - during chlorination **8,** 1960

Capillaries, study of the formation of - with selectively permeable walls **7,** 1794
Carbon black, influence of the mode of - distribution on the electrical conductivity of the binary blend of polymers **7,** 1714
Carbon filler, study of the influence of - on the molecular mobility and structure of polyamide-12 **11,** 2633
Carbon monoxide, the inhibitive action of - during ethylene polymerization on homogeneous complex catalysts **3,** 714
Carbonate bonds, kinetics and mechanism of decay of compounds containing - in alkaline media **2,** 373
Carbonyl groups, interaction of phosphoric acid esters with - in polyethylene **6,** 1513
Carborane-containing polymers, methods of crosslinking unsaturated - and a study of the properties of their copolymers **5,** 1143
Carboxylic acid, mechanism of initiation of polymerization of vinyl monomers by manganese (III) tris-acetyl acetonate– - systems in an aqueous medium **5,** 1074
Carboxylic acids, complexing of trypsin with soluble copolymers based on vinyl pyrrolidone and - **7,** 1588
Carboxylic macronetwork resins, some features of the bonding of proteins to - **12,** 3001
Catalyst, kinetics of homopolycondensation of a bisecondary aromatic glycol in the presence of an acidic - **5,** 1246
Catalyst, sedondary reactions occurring on cometathesis of cyclo-octadiene-1,5 and α-olefines in presence of the - $W(OR)_2Cl_4$–$Al_2(iso\text{-}Bu)_3Cl_3$ **10,** 2370
Catalyst, the use of organomagnesium compounds and alkyl-aluminium-magnesium complexes in a Ziegler - for the synthesis of *cis*-1,4-polyisoprene **10,** 2442

Catalysts, molecular weight distribution of the products of regulated polymerization on - containing two types of mutually transforming active centres 2, 303
Catalysts, ring opening polymerization of cyclooctene by - based on tungsten hexachloride and polyisobutylalumoxanes 6, 1408
Catalysts, stereoselectivity of polymerization of cyclo-octene with ring opening under the influence of complex - based on WCL_6 4, 798
Catalysts, study of epichlorohydrin addition to the copolymer of *p*-benzoquinone and styrene in the presence of amine - 1, 161
Catalysts, the inhibitive action of carbon monoxide during ethylene polymerization of homogeneous complex - 3, 714
Catalytic stage, effect of the nature of the solvent on the - in the condensation of phenol with acetaldehyde 12, 2958
Catalytic systems, special features on atactic polypropylene synthesized using various - based on $TiCl_3$ 8, 2019
Cationic copolymerization of glycolide with *dl*-lactide 6, 1497
Cationic degradation, kinetic features of the - of polyisobutylene 7, 1684
Cationic degradation, the - of polyisobutylene 7, 1676
Cationic polymerization of *dl*-lactide 6, 1491
Cationic polymerization, role of hydroxyl-containing compounds in processes of - of *dl*-lactide 7, 1788
C—C bonds, mechanism of - opening during the initiated oxidation of *cis*-polyisoprene in bulk 4, 909
Cellulose, reactivity of functional groups of nitrate esters of - in the presence of Lewis acids 9, 2144
Cellulose, structural changes in - caused by the action of dichloromethane 7, 1647
Cellulose diacetate, energy of the hydrothermal transition in - 1, 137
Cellulose diacetate, molecular characteristics of graft copolymers of - and polystyrene 6, 1364
Cellulose diacetate films, features of the extensional flow of - in active media 8, 1899
Cellulose nitrate, sedimentation velocity of dilute and moderately concentrated solutions of - 5, 1173
Cellulose nitrates, hydrodynamic properties and conformation characteristics of molecules of - with varying nitrogen content 9, 2212
Chain fragment, calculation of the glass transition temperature of network polymers and determination of the - between crosslinks 1, 64
Chain molecules, diffusional mobility of - 3, 555
Chain propagation and the reactivity of acrylonitrile and isoprene during radical copolymerization 12, 2953
Chain propagation, kinetic study of the mechanism of - in alternating copolymerization of styrene and methyl-α-chloracrylate in the presence of diethylaluminium chloride 11, 2819
Chain transfer reactions by aliphatic mercaptans in the high-temperature polymerization of methylmethacrylate 10, 2414
Charged particles, role of - and relaxation phenomena in the course of mechanical distribution of polymer dielectrics in a strong electric field 4, 838
Chemical crosslinking, effect of — on hydrogen bonds in urethane block copolymers 9, 2247
Chemical deactivation, the relative roles of physical and - of propagating chains during the anionic polymerization of acrylonitrile in a hydrocarbon medium 9, 2285
Chemical stabilization, kinetics of - of polyvinyl chloride 8, 1835

Chemical structure, effect of - of aromatic polyamides on sorption capacity towards ammonia 9, 2236
Chemical structure, effect of the - of liquid media on microcrack formation in crystalline polyolefins undergoing deformation 3, 755
Chemical structure, influence of defects in the - of polyimides on their thermal stability 8, 1967
Chemical structure, on relations between the refractive indices of epoxy polymer networks and their - 7, 1702
Chemical structure, the influence of thermal treatment conditions on features of the - in the imidization of polyamic acids and on the thermal stability of the polyimide products 3, 663
Chitin, conformation of the isolated macromolecule of - 4, 936
Chitosan solutions, flow birefringence and viscosity of - in acetic acid of various ionic strengths 7, 1694
Chlorinated polyvinyltrimethylsilane, compositional inhomogeneity and other molecular characteristics of - 2, 379
Chlorination, calculation of the microstructure of products of homogeneous - of polyvinyl chloride 6, 1356
Chlorination, change in the molecular characteristics of butyl rubber during - 8, 1960
Chloroform, flotation of polystyrene solutions in - 8, 2069
Cholesteric films, certain optical properties of pseudoencapsulated - based on polyurethanes 11, 2641
Chromatography, analysis of molecular weight distribution of bis-phenol epoxide resins by liquid adsorption - 1, 247
Chromatography, influence of the polyelectrolyte nature of lignins and lignocarbohydrate complexes on their elution behaviour during exclusion liquid - on porous silicas in N,N-dimethyl formamide 4, 783
Chromatography, investigation of oligoorganosiloxane based on exclusion liquid - and spectroturbidimetric titration 12, 3017
Chromatography, investigation of polystyrene–polybutadiene block-copolymers by gel-permeation - and by ozonolysis 12, 2986
Chromatography, investigation of polystyrene–polymethylmethacrylate block-copolymers by high-efficiency gel-permeation - 12, 2977
Chromatography, liquid - of low molecular weight polybutadienes 1, 57
Chromatography, separation of mixtures of high-molecular weight compounds by - using silica with grafted glycol groups 8, 2074
Chromatography, study of the molecular weight distribution of boron-siloxane polymers by gel permeation - 1, 1
Chromatography, use of thin-layer - for the study of molecular characteristics of oligoarylates 11, 2859
1,4-*cis*-polybutadiene, crystallization and melting of filled - 11, 2787
***Cis*-1,4-polyisoprene,** kinetics of the thermooxidative degradation of - in bulk in the presence of phenol antioxidants 5, 1198
***Cis*-polyisoprene,** mechanism of C—C bond opening during the initiated oxidation of - in bulk 4, 909
***Cis*-1,4-polyisoprene,** on the high temperature relaxation transitions in - 2, 388
***Cis*-1,4-polyisoprene,** the use of organomagnesium compounds and alkyl-aluminium magnesium complexes in a Ziegler catalyst for the synthesis of - 10, 2442
^{13}C NMR spectroscopy of products of cometathesis of cyclooctadiene-1,5 and α-olefines 3, 589

^{13}C-nuclei, molecular movement and magnetic relaxation of - of organic ions in the ion exchange resin phase 11, 2655
Coil, towards a theory of the - -globule transition in comb-like macromolecules 6, 1370
Colloidal particles, computer simulation of the interaction of - covered by an oriented polymeric monolayer 12, 3024
Colloidal particles, on the interaction of - in a polymer solution 8, 1971
Cometathesis, ^{13}C NMR spectroscopy of products of - of cyclooctadiene-1,5 and α-olefines 3, 589
Cometathesis, secondary reactions occurring on - of cyclo-octadiene-1,5 and α-olefines in presence of the catalyst $W(OR)_2Cl_4$–$Al_2(iso\text{-}Bu)_3Cl_3$ 10, 2370
Complex catalysts, stereoselectivity of polymerization of cyclo-octene with ring opening under the influence of - based on WCL_6 4, 798
Complex formation, a study of - between polydienyl lithium chains and electron donors in a hydrocarbon medium in the presence of the monomer 4, 870
Complex formation, role of - during the homo- and copolymerization of methyl-acrylonitrile and acrylic acid in dimethyl sulphoxide–water solutions 7, 1730
Composition material, effect of deformation on the structure of the matrix of a - 9, 2259
Computer simulation of the interaction of colloidal particles covered by an oriented polymeric monolayer 12, 3024
Computer simulation, study of the conformational structure of macromolecules under stretching. Results of the - and of IR spectroscopy 7, 1756
Concentrated solutions, sedimentation velocity of dilute and moderately - of cellulose nitrate 5, 1173
Concentration profiles, consideration of instrumental expansion in order to restore - using electron-probe microanalysis in polymer–polymer systems 3, 766
Condensation, effect of the nature of the solvent on the catalytic stage in the - of phenol with acetaldehyde 12, 2958
Conformation of the isolated macromolecule of chitin 4, 936
Conformation change-overs, mechanism of - in polymer chains 6, 1529
Conformation characteristics, hydrodynamic properties and - of molecules of cellulose nitrates with varying nitrogen content 9, 2212
Conformation characteristics, light scattering of solutions of polyamidohydrazide and - of its molecules 9, 2221
Conformational analysis, a - of polyunsaturated molecules in solution. Continuum model 3, 638
Conformational properties of poly-2-methyl-N-vinylimidazole 10, 2448
Conformations and dipole moments of poly(methyl)methacrylate molecules 1, 143
Conformations of polymer chains grafted to an impermeable plane surface 9, 2165
Conversion, analysis of the special aspects of the kinetic scheme of radical polymerization of methyl methacrylate for high degrees of monomer - 1, 49
Copolyamides, fluorine-containing ordered - 9, 2174
Copolyamides, synthesis and study of the properties of aromatic fluorine-containing - 2, 328
Copolycarbonates, an NMR study of fluorine-containing - 11, 2687
Copolycondensation of diamines, dicarboxylic acid chlorides and aromatic disulphonylchlorides in amide solvents 8, 1864
Copolymer, mechanism of radiation grafting of methyl-α-fluoroacrylate and α,β,β-trifluorostyrene to a perfluorinated - 4, 946
Copolymer, study of epichlorohydrin addition to the - of *p*-benzoquinone and styrene in the presence of amine catalysts 1, 161

Copolymer, study of thermal transformations of the - of iso- and tetraphthalic acids and diphenylolpropane 6, 1468
Copolymer, the effect of the filler on relaxational transitions in butadiene-methylstyrene - 3, 595
Copolymerization, anionic non-equilibrium - of hexaorganylcyclotrisiloxanes with polar substituents at the silicon atom 12, 2899
Copolymerization, cationic - of glycolide with *dl*-lactide 6, 1497
Copolymerization, chain propagation and the reactivity of acrylonitrile and isoprene during radical - 12, 2953
Copolymerization, complex formation in the radical - of some vinyl ketones with maleic anhydride 7, 1723
Copolymerization, dilatometric study of the solution - of 1,1,5-trihydroperfluoroamyl acrylate and methacrylonitrile 12, 3059
Copolymerization, effect of electron-donor compounds on the of styrene and its derivatives in the presence of $SnCl_4$ and $TiCl_4$ 4, 877
Copolymerization, kinetic study of the mechanism of chain propagation in alternating - of styrene and methyl-α-chloracrylate in the presence of diethylaluminium chloride 11, 2819
Copolymerization, kinetics of alternating - of allylphenyl and allyl cyclohexyl ethers with maleic anhydride 11, 2806
Copolymerization, method of analysing gel-chromatographic curves of polymers and study of the mechanism of radical - of isoprene with acrylonitrile 7, 1805
Copolymerization, 2-methylenespiro-orthoesters in polymerization and - reactions 4, 857
Copolymerization, network formation on radiation three-dimensional - of α,ω-dibutyl-bis-maleate triethylene glycol with styrene 9, 2097
Copolymerization, of 1-vinyl-1,2,4,-triazole with methyl methacrylate and styrene 1, 15
Copolymerization, role of complex formation during the homo- and - of methacrylonitrile and acrylic acid in dimethyl sulphoxide–water solutions 7, 1730
Copolymerization, some aspects of the anionic - of cyclic sulphides with hexamethylcyclotrisiloxane 12, 2971
Copolymerization, spin trap study of the - of styrene with sulphur dioxide 6, 1425
Copolymerization, study of the kinetic features of emulsion - of vinylidene fluoride with hexafluoropropylene 11, 2714
Copolymers, action of sulphur dioxide on block - containing polybutadiene and polydimethylsiloxane 2, 275
Copolymers, complexing of trypsin with soluble - based on vinyl pyrrolidone and carboxylic acids 7, 1588
Copolymers, effect of chemical crosslinking on hydrogen bonds in urethane block - 9, 2247
Copolymers, evaluation of the type of grafting and composition of polyethylene graft - by the combination of IR spectroscopy and attenuated total internal reflection 5, 1283
Copolymers, features of liquid and amorphous-crystalline phase separation processes in block - and in mixtures with variable molecular weights 2, 395
Copolymers, hydroxylation of styrene–diene triblock - in solution and on the surface 2, 489
Copolymers, methods of crosslinking unsaturated carborane-containing polymers and a study of the properties of their - 5, 1143
Copolymers, molecular characteristics of graft - of cellulose diacetate and polystyrene 6, 1364
Copolymers, molecular characteristics of triple - of styrene with acrylonitrile and methylmethacrylate in dilute solutions 12, 2889

Copolymers, physico-mechanical properties of polyarylate–polybutadiene and polysulphone–polybutadiene block - **10,** 2561
Copolymers, properties of solutions of poly-(arylate-arylene sulphonoxide) block - **7,** 1778
Copolymers, rheological properties of the materials based on polystyrene modified with block - of butadiene and styrene under conditions of shear and uniaxial stretching **1,** 181
Copolymers, some aspects of the ozonization of isobutylene - with isoprene in solution **8,** 1871
Copolymers, sorption, structure and thermodynamic stability of polysulphone–polybutadiene block - **10,** 2571
Copolymers, study of photoelastic properties of films of styrene–butadiene ternary block - **7,** 1766
Copolymers, study of the thermal and viscoelastic properties of phosphorus-containing urethane block - **6,** 1328
Copolymers, synthesis of alternating and random - of ethylene with maleic anhydride **9,** 2151
Copolymers, synthesis of - containing 2,5,7-trinitrofluorenone fragments by modification of polyepichlorohydrin **9,** 2161
Copolymers, the phase composition of polyblock block- - of polyarylene sulphonoxide and polyethylene oxide **9,** 2326
Copolymers, thermodynamics of statistical - of *n*-octyl methacrylate and N-vinyl carbazole **5,** 1055
Copper β-diketonates, the complexing of oligomeric polyoxyethylene glycols of various molecular weight **11,** 2696
Creep, a study of the regularities in viscoelastic behaviour of heat-resistant polymers under conditions of - , exemplified by polybenzoxazole **7,** 1659
Creep conditions, a study of the mechanical serviceability of polymide films under - **11,** 2732
Crosslinked polymers, secondary reactions of aminolysis and ring formation taking place with the formation of - from diglycidyl ethers of dicarboxylic acids and aromatic diamines **2,** 479
Crosslinking, effect of deformation during - on elastic properties of rubbers **1,** 204
Crosslinking, methods of - unsaturated carborane-containing polymers and a study of the properties of their copolymers **5,** 1143
Crosslinking of polydimethylvinylsiloxane rubber by oligoorganosilane with functional groups at the silicon atom **5,** 1192
Crosslinks, calculation of the glass transition temperature of network polymers and determination of the chain fragment between - **1,** 64
Cryogenic temperatures, study of the adhesion of polyethylene to metals at - **2,** 412
Crystalline dextran, criteria of choice of the helix type in - **8,** 1998
Crystalline lattice, influence of loading and change in temperature on the parameters of the - of polycaproamide **1,** 42
Crystalline polymers, thermotropic liquid - in electric and magnetic fields. Review **12,** 2863
Crystalline polyolefins, effect of chemical structure of liquid media on microcrack formation in - undergoing deformation **3,** 755
Crystalline structure, theoretical determination of the - of polyethylene **3,** 707
Crystallization and melting of filled 1,4-*cis*-polybutadiene **11,** 2787
Crystallization, heterogeneous non-isothermal - of polymers **11,** 2839
Crystallization, influence of the defective boundary layer on nucleation during - of oriented polymer melts **2,** 294
Crystallization, the effect of an aerosil on melting and - of unvulcanized blends and vulcanizates based on the siloxane rubber, SKTFV **3,** 603

Crystallization, the influence of presence on nucleation during - from the melt of oligoesters of various molecular weights 7, 1639
Crystallizing plasticizer, the possibility of using the interference micromethod for plotting phase diagrams of polymer– - systems 2, 520
Current density, influence of - and composition of solution on the molecular weight of a polymer formed on an electrode 9, 2105
Cyclolinear organosiloxanes, structure of - 7, 1625
Cyclooctadiene-1,5, ^{13}C NMR spectroscopy of products of cometathesis of - and α-olefines 3, 589
Cyclo-octadiene-1,5, secondary reactions occurring on cometathesis of - and α-olefines in presence of the catalyst $W(OR)_2Cl_4$–$Al_2(iso\text{-}Bu)_3Cl_3$ 10, 2370
Cyclooctene, ring opening polymerization of - by catalysts based on tungsten hexachloride and polyisobutylalumoxanes 6, 1408
Cyclo-octene, stereoselectivity of polymerization of - with ring opening under the influence of complex catalysts based on WCl_6 4, 798
Cycloparaffins, a comparison of the relation of reactivities to stress in polymers and model - 3, 655
Cyclopentadiene, radiation-induced ionic polymerization at low temperatures - . in a butyl chloride glassy matrix 4, 953

Decay, kinetics and mechanism of - of compounds containing carbonate bonds in alkaline media 2, 373
Deformation, effect of - on the structure of the matrix of a composition material 9, 2259
Deformation, effect of chemical structure of liquid media on microcrack formation in crystalline polyolefins undergoing - 3, 755
Deformation, effect of - during crosslinking on elastic properties of rubbers 1, 204
Deformation, segmental orientation during - of polyurethane-urea elastomers 1, 123
Deformation, the durability and - behaviour of polybutadiene under uniaxial stretching in liquid media 4, 916
Degradation of polyvinyl alcohol surgical thread 10, 2418
Densely crosslinked polymers, structure of - of dimethacrylates and oligo-*p*-methacrylates 9, 2111
Detectors, estimation of instrumental widening on using continuous absolute - in gel-permeation chromatography 2, 511
Dextran, criteria of choice of the helix type in crystalline - 8, 1998
Diacyl peroxide groups, polymerization of styrene and isoprene initiated by oligo-peroxides containing perester and - 9, 2138
Diamagnetic anisotropy, method of studying - of polypropylene fibres 7, 1801
Diamines, copolycondensation of - , dicarboxylic acid chlorides and aromatic disulphonylchlorides in amide solvents 8, 1864
Diamines, heat stability of polyimides based on nitrogen containing - and dianhydrides 5, 1097
Diamines, supermolecular-structure formation in films prepared from dianhydride of 3,3′,4,4′-diphenyloxide tetracarboxylic acid and various - 10, 2433
Diamines, the kinetics of secondary reaction in a network polymer based on aromatic and aromatic epoxides 9, 2320
4,4′-Diaminodiphenylmethane, analysis of the kinetics and mechanism of polymerization of N,N′- 4,4′-diphenylmethane-bis-maleimide and - 2, 404
Dianhydride, radiation impulse induced electrical conductivity of aromatic polyimides with - components of differing structure 1, 113

Dianhydride of 3,3′,4,4′-diphenyloxide tetracarboxylic acid, supermolecular-structure formation in films prepared from - and various diamines 10, 2433
Dianhydrides, heat stability of polyimides based on nitrogen containing diamines and - 5, 1097
α, ω-Dibutyl-bis-maleate triethylene glycol, network formation on radiation three-dimensional copolymerization of - with styrene 9, 2097
Dicarboxylic acid chlorides, copolymerization of diamines, - and aromatic disulphonylchlorides in amide solvents 8, 1864
Dicarboxylic acids, secondary reactions of aminolysis and ring formation taking place with the formation of crosslinked polymers from diglycidyl ethers of - and aromatic diamines 2, 479
Dichloromethane, structural changes in cellulose caused by the action of - 7, 1647
Dielectric polarization on hydration of crosslinked polystyrene aminodiacetic acid 8, 1845
Diene, hydroxylation of styrene– - triblock copolymers in solution and on the surface 2, 489
Diethylaluminium chloride, kinetic study of the mechanism of chain propagation in alternating copolymerization of styrene and methyl-α-chloracrylate in the presence of - 11, 2819
Diethylphosphite and diethylphosphine oxide, interaction of - with vinyl-containing organocyclosiloxanes 2, 420
Diffusion, effect of surface tension of the solvent on the duration of the induction period of - in the methanol–PMMA system 8, 1878
Diffusion in polyvinyl chloride–oligoetheracrylate systems 1, 190
Diffusion, method for determining the rate of solution, coefficient of - and adsorption of solid low-molecular weight components in filled elastomers 10, 2589
Diffusion coefficients, dependence on pressure of the - of low molecular weight particles in a polymer 11, 2664
Diffusion method, study of the relaxation properties of elastomers using a - 8, 2011
Diffusional mobility of chain molecules 3, 555
Diffusional regime, the - in the initiated oxidation of polymers 6, 1384
Diglycidyl ether, study of epoxide polymers based on resorcinol - modified by low-molecular weight rubber 12, 2947
Diglycidyl ethers, secondary reactions of aminolysis and ring formation taking place with the formation of crosslinked polymers from - of dicarboxylic acids and aromatic diamines 2, 479
Dilatometric study of the solution copolymerization of 1,1,5-trihydroperfluoroamyl acrylate and methacrylonitrile 12, 3059
Dilute solutions, the molecular characteristics and properties of - of *trans*-polypentenamers 11, 2721
Dilute solutions, viscometric properties of - of hydrolyzed polyacrylamide 10, 2380
Dimeric compounds, calculation of excess entropy of mixing of low molecular weight compounds with melts of heterochain polymeric and - and the entropy contribution of macromolecules in the liquid 1, 98
Dimethacrylates, structure of densely crosslinked polymers of - and oligo-*p*-methacrylates 9, 2111
1,1-Dimethylallene, study of polymerization of - by the action of bis-π-allylnickel bromide 9, 2265
Dimethylaminoethyl methacrylate, study of kinetics and the mechanism of graft polymerization of - on polycaproamide in the presence of reversible initiating systems 5, 1271

Dimethyl sulphoxide, role of complex formation during the homo- and copolymerization of methacrylonitrile and acrylic acid in - –water solutions 7, 1730
Diphenyliodonium boron fluoride, study of the radiation induced polymerization of epichlorohydrin in the presence of - 7, 1741
Diphenylolpropane, study of thermal transformations of the copolymer of iso- and tetraphthalic acids and - 6, 1468
3,3′,4,4′-Diphenyloxide tetracarboxylic acid, supermolecular-structure formation in films prepared from dianhydride of - and various diamines 10, 2433
Dipole moments, conformations and - of poly(methyl)methacrylate molecules 1, 143
Dispersed oxides, on the influence of - on the radiation induced oxidation of polyethylene 10, 2485
Dispersion, influence of the - of active fillers on the fine structure of the relaxation spectra of elastomers 4, 923
Disulphonylchlorides, copolycondensation of diamines, dicarboxylic acid chlorides and aromatic - in amide solvents 8, 1864
2,2′-Di-1,6,7-trihydroxyl-3-methyl-5-isopropyl-8-aldehydonaphthyl, thermodegradation of polyvinyl chloride in presence of - 4, 823
***dl*-lactide,** cationic copolymerization of glycolide with - 7, 1497
***dl*-lactide,** cationic polymerization of - 6, 1491
***dl*-lactide,** role of hydroxyl-containing compounds in processes of cationic polymerization of - 7, 1788
Domain structuring, influence of temperature on - in segmented urethane polymers 9, 2120
Drug substances, experimental study of mass transfer of some model and - across microporous polymer membranes in aqueous solutions 4, 830
Durability, the - and deformation behaviour of polybutadiene under uniaxial stretching in liquid media 4, 916

Elastic properties, effect of deformation during crosslinking on - of rubbers 1, 204
Elasticity, study of the conformational - of polymer chains based on the Monte-Carlo method 7, 1747
Elastomer, mechanism of formation of adhesion bonds between an - and phenol-formaldehyde oligomer 2, 433
Elastomer, study of branched oligoesters and crosslinked polyurethane - by the NMR method 2, 264
Elastomers, influence of the dispersion of active fillers on the fine structure of the relaxation spectra of - 4, 923
Elastomers, mechanism of action of triethanolamine trimethacrylate during salt vulcanization of - with reactive ester groups 6, 1345
Elastomers, method for determining the rate of solution, coefficient of diffusion and adsorption of solid low-molecular weight components in filled - 10, 2589
Elastomers, on refractometric determination of the properties of boundary layer of - 9, 2197
Elastomers, on the kinetics of ozone absorption by - of various structures 8, 1993
Elastomers, segmental orientation during deformation of polyurethane-urea - 1, 123
Elastomers, study of the relaxation properties of - using a diffusion method 8, 2011
Elastomers, thermoelastic properties of polyurethane - 2, 341
Electric and magnetic fields, thermotropic liquid crystalline polymers in - . Review 12, 2863
Electric birefringence, use of modulation of elliptic light polarization for the study of - of polymer solutions in pulse fields 6, 1541

Electric field, role of charged particles and relaxation phenomena in the course of mechanical disruption of polymer dielectrics in a strong - 4, 838
Electrical conductivity, influence of the mode of carbon black distribution on the - of the binary blend of polymers 7, 1714
Electrical conductivity, radiation impulse induced - of aromatic polyimides with dianhydride components of differing structure 1, 113
Electrical effects by the action of low energy electrons on polyarylates 4, 994
Electrically controlled organosilicon gels, rheological properties of - 11, 2780
Electrochemical preparation of polymer films on metals from aqueous solutions of acrylamide and formaldehyde 8, 1980
Electrochemically initiated polymerization, influence of the electrode potential and of solvents on the process of polymer film formation during the - or meth-acrylatemethyldiethoxymethyl silane 9, 2188
Electrode potential, influence of the - and of solvents on the process of polymer film formation during the electrochemically initiated polymerization of meth-acrylate methyldiethoxymethyl silane 9, 2188
Electron-donor compounds, effect of - on the copolymerization of styrene and its derivatives in the presence of $SnCl_4$ and $TiCl_4$ 4, 877
Electron donors, a study of complex formation between polydienyl lithium chains and - in a hydrocarbon medium in the presence of the monomer 4, 870
Electron microscopy, analytical - in studying adhesive compounds 10, 2579
Electronic absorption spectra, study of acidic-basic properties of polymeric hydro-xyazophenyl acetylene dyes with the help of - 2, 452
Electrons, electrical effects by the action of low energy - on polyarylates 4, 994
π-Electrons, intramolecular association of end OH-groups with the - of double bonds in hydroxy-oligobutadienes 8, 1913
Electrons, the accumulation of volume charges in polymeric materials during ir-radiation by low energy - under vacuum 5, 1206
Electrophilic substitution, molecular and hydrodynamic characteristics of an aro-matic polysulphone obtained by - 10, 2375
Electrophysical properties, the influence of high pressure and shear strains on some - of polyphthalocyanines 3, 647
Elliptic light polarization, use of modulation of - for the study of electric birefrin-gence of polymer solutions in pulse fields 6, 1541
Elongation, effect of anisotropy of high-density polyethylene on special features of its behaviour on uniaxial - 11, 2832
Elongation, principal possibility of strength reinforcement of polypropylene during uniaxial - in an oxidizing medium 8, 2029
Emulsion copolymerization, study of the kinetic features of - of vinylidene fluoride with hexafluoropropylene 11, 2714
Emulsion polymerization, molecular weight distribution and topological features of some systems of - 2, 426
End groups, role of - in polyvinylidene fluoride 10, 2490
Entropy, calculation of excess - of mixing of low molecular weight compounds with melts of heterochain polymeric and dimeric compounds and the entropy contribution of macromolecules in the liquid 1, 98
Epichlorohydrin, study of - addition to the copolymer of *p*-benzoquinone and styrene in the presence of amine catalysts 1, 161
Epichlorohydrin, study of the molecular weight distribution and structure of oligo-mers prepared by alkylation of toluene with - 1, 129

Epichlorohydrin, study of the radiation induced polymerization of - in the presence of diphenyliodonium boron fluoride 7, 1741
Epoxide, the mechanism of formation of phase structure of - –rubber systems 9, 2305
Epoxide-amine molecular networks, structure and properties of - 8, 1856
Epoxide oligomer, structure of network polymers based on oligoisoprene dihydrazides and an - 5, 1063
Epoxide polymers, study of - based on resorcinol diglycidyl ether modified by low-molecular weight rubber 12, 2947
Epoxide polymers, synthesis and properties of sulphur-containing oligoamines and - on their basis 6, 1523
Epoxide resins, study of comparative characteristics of adhesion strength of - based on sulphone and bis-phenol A 8, 2066
Epoxide ring, a ^{19}F NMR study of the direction of opening of the - in the uncatalysed reaction of α-oxides with phenols and alcohols 7, 1653
Epoxides, the kinetics of secondary reaction in a network polymer based on aromatic diamines and aromatic - 9, 2320
Epoxyamine networks, glass temperature and the structure of dense - 1, 209
Epoxy-containing oligomers, study of the formation of - and network polymers. Model reactions of phenols with glycidyl ethers catalyzed by aliphatic and heteroaromatic amines 4, 1002
Epoxy polymer networks, on relations between the refractive indices of - and their chemical structure 7, 1702
Erbium, polychelates of - and ytterbium prepared from tetraacetyl ethane 10, 2512
Ester groups, mechanism of action of triethanolamine trimethacrylate during salt vulcanization of elastomers with reactive - 6, 1345
Ethylene, synthesis of alternating and random copolymers of - with maleic anhydride 9, 2151
Ethylene, telomerization of - by the system $TiCl_4$–$(C_2H_5)_{1.5}AlCl_{1.5}$–sec-$C_8H_{17}Cl$ 9, 2180
Ethyleneimine, polymerization of complexes of - and its derivatives and properties of the complexes obtained 8, 2005
Ethylene polymerization, the inhibitive action of carbon monoxide during - on homogeneous complex catalysts 3, 714
Experimental study of mass transfer of some model and drug substances across microporous polymer membranes in aqueous solutions 4, 830
Extensional flow, features of the - of cellulose diacetate films in active media 8, 1899

Fibres, method of studying diamagnetic anisotropy of polypropylene - 7, 1801
Films, gas permeability of oriented polyethylene - 1, 26
Flexibility, orientation ordering in solutions of polymer chains with rotational-isomeric mechanism of - 5, 1230
Flotation of polystyrene solutions in chloroform 8, 2069
Flow birefringence and orientation angles in poly-α-methylstyrene solutions 8, 1890
Flow birefringence and viscosity of chitosan solutions in acetic acid of various ionic strengths 7, 1694
Flow-birefringence data, concerning the conformation of an aromatic polyamide in an organic solvent and in concentrated sulphuric acid according to - 8, 1906
Fluorescence method, study of the mobility of low molecular weight compounds in various polymer matrices using the - 4, 1020
Fluorinated polymers, relations between the thermal stability of partially - and their structure 12, 2995

Fluorine-containing copolycarbonates, an NMR study of - 11, 2687
Fluorine-containing ordered copolyamides 9, 2174
Fluorine substituted derivatives, on the polymerization of - of benzene in a glow discharge 5, 1215
Fluoroplastics, determining the phase structure of - using the NMR free induction signal 5, 1259
^{19}F NMR study, a - of the direction of opening of the epoxide ring in the uncatalysed reaction of α-oxides with phenols and alcohols 7, 1653
Formaldehyde, electrochemical preparation of polymer films on metals from aqueous solutions of acrylamide and - 8, 1980
Formaldehyde, study of polycondesation of furfuryl alcohol with - catalyzed by acids 1, 228
Free-radical transformations of polyethyleneterephthalate initiated by photoactive additives 1, 167
Free radicals, tunnel mechanism of microdiffusion of - in solid organic substances 11, 2768
Furfuryl alcohol, study of polycondensation of - with formaldehyde catalyzed by acids 1, 228

Gas evolution technique, investigation of the reaction of phenols with hexamethylene tetramine using a - 8, 1945
Gas permeability of oriented polyethylene films 1, 26
Gas permeability, selectivity of - of polymers 1, 33
Gel chromatographic analysis of the molecular characteristics of polycarbonate 11, 2647
Gel-chromatographic curves, method of analysing - of polymers and study of the mechanism of radical copolymerization of isoprene with acrylonitrile 7, 1805
Gel chromatography, study of molecular weight characteristics of polysulphone by - 2, 438
Gel-effect, rheological study of the mechanism of - in radical polymerization of butyl methacrylate in bulk 11, 2826
Gel-permeation chromatography, estimation of instrumental widening on using continuous absolute detectors in - 2, 511
Gel-permeation chromatography, investigation of polystyrene–polybutadiene block-copolymers by - and by ozonolysis 12, 2986
Gel-permeation chromatography, investigation of polystyrene–polymethylmethacrylate block-copolymers by high-efficiency - 12, 2977
Gel-permeation chromatography, study of the formation of polyphenylquinoxalines by - 2, 463
Gel permeation chromatography, study of the molecular weight distribution of boronsiloxane polymers by - 1, 1
Gelation, spontaneous - of polymer solutions 3, 741
Gels, rheological properties of electrically controlled organosilicon - 11, 2780
Gels, the PMR line shape in crosslinked polymeric - 12, 3039
Glass temperature and the structure of dense epoxyamine networks 1, 209
Glass transition temperature, calculation of the - of network polymers and determination of the chain fragment between crosslinks 1, 64
Glassy polymers, link between low frequency skeletal vibrations in - and equilibrium rigidity of macromolecules 7, 1597
Globule, towards a theory of the coil– - transitions in comb-like macromolecules 6, 1370
Glow discharge, on the polymerization of fluorine substituted derivatives of benzene in a - 5, 1215

Glycidyl ethers, study of the formation of epoxy-containing oligomers and network polymers. Model reactions of phenols with - catalyzed by aliphatic and hetero-aromatic amines 4, 1002
Glycol, kinetics of homopolycondensation of a bisecondary aromatic - in the presence of an acidic catalyst 5, 1246
Glycol groups, separation of mixtures of high-molecular weight compounds by chromatography using silica with grafted - 8, 2074
Glycolide, cationic copolymerization of - with *dl*-lactide 6, 1497
Graft copolymers, molecular characteristics of - of cellulose diacetate and polystyrene 6, 1364
Graft polymer, analysis of the distribution of - in a polymer substrate by IR spectroscopy 6, 1539
Grafting, effect of - the initiator to a solid phase on the elementary reactions in radical polymerization 4, 883
Grafting, mechanism of radiation - of methyl-α-fluoroacrylate and α,β,β-trifluorostyrene to a perfluorinated copolymer 4, 946
Growing chain, limitation of the - during polymerization of isobutylene in the presence of methyl benzenes 2, 257

Heat-resistant polymers, a study of the regularities in viscoelastic behaviour of - under conditions of creep, exemplified by polybenzoxazole 7, 1659
Heat-resistant polymers, study of regularities of the viscoelastic behaviour of - (polyoxadiazole and polyimide) 1, 263
Heat stability of polyimides based on nitrogen containing diamines and dianhydrides 5, 1097
Heat treatment, change in the supermolecular structure of oriented polyethylene in the course of short-term - above the melting point 4, 892
Helix type, criteria of choice of the - in crystalline dextran 8, 1998
Hetero-aromatic amines, study of the formation of epoxy-containing oligomers and network polymers. Model reactions of phenols with glycidyl ethers catalyzed by aliphatic and - 4, 1002
Heterocycles, ionic polymerization of - . Review 7, 1551
Heterofunctional polymers, the synthesis of - with peroxide and anhydride groups 5, 1152
Heterogeneous non-isothermal crystallization of polymers 11, 2839
Heterophase polymerization, formation of secondary structure in bulk polymer from - of vinyl chloride 11, 2852
Hexafluoropropylene, study of the kinetic features of emulsion copolymerization of vinylidene fluoride with - 11, 2714
Hexamethylcyclotrisiloxane, some aspects of the anionic copolymerization of cyclic sulphides with - 12, 2971
Hexamethylene tetramine, investigation of the reaction of phenols with - using a gas evolution technique 8, 1945
Hexane, effect of - on the radiothermoluminescence of polyethylene 5, 1081
Hexaorganylcyclotrisiloxanes, anionic non-equilibrium copolymerization of - with polar substituents at the silicon atom 12, 2899
High frequency region, influence of the hydrodynamic interaction of the solutions of macromolecules in the - 5, 1087
High-molecular weight compounds, XXI All-Union conference on - 5, 1291
High-molecular weight compounds, separation of mixtures of - by chromatography using silica with grafted glycol groups 8, 2074

High pressure, homogenization of polypropylene–polyethylene mixtures under - and in shear deformation in the presence of acrylamide **1,** 174
High pressure, the influence of - and shear strains on some electrophysical properties of polyphthalocynines **3,** 647
High pressure, thermooxidative stability of polypropylene under the simultaneous action of - and shear deformation **3,** 679
High-temperature polymerization, chain transfer reactions by aliphatic mercaptans in the - of methylmethacrylate **10,** 2414
High-temperature pyrolysis, kinetics and mechanism of - of polyacrylonitrile **4,** 958
High temperature relaxation transitions, on the - in *cis*-1,4-polyisoprene **2,** 388
^{1}H-NMR spectroscopy, use of lanthanide shift reagents for analysing the microstructure of polydienes and polyalkenamers by - **5,** 1104
Homo- and copolymerization, role of complex formation during the - of methacrylonitrile and acrylic acid in dimethyl sulphonoxide–water solutions **7,** 1730
Homogeneous chlorination, calculation of the microstructure of products of - of polyvinyl chloride **6,** 1356
Homogeneous complex catalysts, the inhibitive action of carbon monoxide during ethylene polymerization of - **3,** 714
Homogenization of polypropylene–polyethylene mixtures under high pressure and in shear deformation in the presence of acrylamide **1,** 174
Homopolycondensation, kinetics of - of a bisecondary aromatic glycol in the presence of an acidic catalyst **5,** 1246
Hydration, dielectric polarization on - of crosslinked polystyrene aminodiacetic acid **8,** 1845
Hydrazide groups, polarographic study of the reactivity of the amine and - in the phthalation reaction **4,** 844
Hydrocarbon medium, a study of complex formation between polydienyl lithium chains and electron donors in a - in the presence of the monomer **4,** 870
Hydrocarbon medium, the relative roles of physical and chemical deactivation of propagating chains during the anionic polymerization of acrylonitrile in a - **9,** 2285
Hydrocarbon oligomers, achievements in the synthesis of reactive - with terminal functional groups. Review **10,** 2341
Hydrodynamic characteristics, molecular and - of an aromatic polysulphone obtained by electrophilic substitution **10,** 2375
Hydrodynamic interaction, influence of the - on the viscoelastic properties of solutions of macromolecules in the high frequency region **5,** 1087
Hydrodynamic properties and conformation characteristics of molecules of cellulose nitrates with varying nitrogen content **9,** 2212
Hydrogen bonds, effect of chemical crosslinking on - in urethane block copolymers **9,** 2247
Hydrolyzed polyacrylamide, viscometric properties of dilute solutions of - **10,** 2380
Hydrolyzed polymers, synthesis and properties of - of maleic anhydride **9,** 2254
Hydrophosphorylation of synthetic rubbers **2,** 472
Hydrostatic pressure, study of the rheological properties of polymer melts under - **10,** 2470
Hydrothermal transition, energy of the - in cellulose diacetate **1,** 137
Hydroxylation of styrene–diene triblock copolymers in solution and on the surface **2,** 489
Hydroxyl-containing compounds, role of - in processes of cationic polymerization of *dl*-lactide **7,** 1788
α,ω-Hydroxyoligobutadiene, association of OH groups in a solution of oligooxyoctene triol in - **6,** 1461
Hydroxy-oligobutadienes, intramolecular association of end OH-groups with the π-electrons of double bonds in - **8,** 1913

Imidization, the influence of thermal treatment conditions on features of the chemical structure in the - of polyamic acids and on the thermal stability of the polyimide products 3, 663
Induction period, effect of surface tension of the solvent on the duration of the - of diffusion in the methanol–PMMA system 8, 1878
Infrared investigation of the orientational properties of a thermotropic liquid crystalline polymer with side mesogenic groups 3, 722
Inhibition of macromolecular crosslinking during the degradation of polyvinylchloride 4, 850
Inhibition, mechanism of the - of polymerization of vinyl monomers initiated by benzoyl peroxide by stable nitroxide radicals 10, 2497
Inhibitive action, the - of carbon monoxide during ethylene polymerization on homogeneous complex catalysts 3, 714
Inhomogeneity, chemical - of terpolymers of styrene with acrylonitrile and methyl methacrylate 6, 1337
Inhomogeneity, compositional - and other molecular characteristics of chlorinated polyvinyltrimethylsilane 2, 379
Initiation mechanism, study of the - of post-radiation graft polymerization of vinyl monomers on solid inorganic materials 2, 495
Initiator, effect of grafting the - to a solid phase on the elementary reactions in radical polymerization 4, 883
Inorganic materials, the study of photo-initiated graft polymerization of vinyl monomers on - 9, 2314
Interference micromethod, the possibility of using the - for plotting phase diagrams of polymer–crystallizing plasticizer systems 2, 520
Intermacromolecular amidization in dilute aqueous solution of a polyelectrolytic complex of polyacrylic acid and linear polyethylene imine 7, 1771
Intermolecular interaction, quantum-chemical calculation of - in poly-(4′4′-diphenylene)pyromellitimide 2, 320
Intermolecular interactions of stereospecific sequences of polymethyl methacrylates 1, 154
Intramolecular association of end OH-groups with the π-electrons of double bonds in hydroxy-oligobutadienes 8, 1913
Intramolecular reactions, some problems of the theory of polymer-analogous and - of macromolecules. Review 11, 2603
Ion exchange resin phase, molecular movement and magnetic relaxation of ^{13}C-nuclei of organic ions in the - 11, 2655
Ionic polymerization of heterocycles. Review 7, 1551
Ionic strengths, flow birefringence and viscosity of chitosan solutions in acetic acid of various - 7, 1694
IR spectroscopic data, the structure of liquid polyethylene: computer simulation and - 8, 1937
IR spectroscopic study of mechanochemical processes in polymers stimulated by orientation stretching 4, 816
IR spectroscopy, analysis of the distribution of graft polymer in a polymer substrate by - 6, 1539
IR spectroscopy, evaluation of the type of grafting and composition of polyethylene graft copolymers by the combination of - and attenuated total internal reflection 5, 1283
IR spectroscopy, study of the conformational structure of macromolecules under stretching. Results of the computer simulation and of - 7, 1756
Irradiation, the accumulation of volume charges in polymeric materials during - by low energy electrons under vacuum 5, 1206

Isobutylene, limitation of the growing chain during polymerization of - in the presence of methyl benzenes 2, 257
Isobutylene copolymers, some aspects of the ozonization of - with isoprene in solution 8, 1871
Isocyanate prepolymers, influence of the branching of - on their rheological properties 11, 2758
Isocyanates, kinetics of the reactions of - with polyoxypropylene glycols 6, 1351
Isoprene, chain propagation and the reactivity of acrylonitrile and - during radical copolymerization 12, 2953
Isoprene, method of analysing gel-chromatographic curves of polymers and study of the mechanism of radical copolymerization of - with acrylonitrile 7, 1805
Isoprene, polymerization of styrene and - initiated by oligoperoxides containing perester and diacyl peroxide groups 9, 2138
Isoprene, some aspects of the ozonization of isobutylene copolymers with - in solution 8, 1871
Isotope exchange, use of accessibility as determined by H→D - for the study of physico-chemical properties of aliphatic polyamides 11, 2813
Isotropic and oriented films, comparative study of kinetics of thermo-oxidative degradation of poly-4-methylpent-1-ene and polypropylene (-) 4, 967

Kaolin, kinetic features of the polymerization of styrene adsorbed on - 11, 2764
Kinetic constants, methods of evaluating individual - of an irreversible polymer-analogue reaction, accompanied by the "neighbour" effect using experimental results of triad distribution in reaction products 4, 1026
Kinetic features of radical polymerization of monomers of N,N-dialkyl-N,N-diallyl-ammonium chloride series 3, 748
Kinetic features of the cationic degradation of polyisobutylene 7, 1684
Kinetic features of the polymerization of styrene adsorbed on kaolin 11, 2764
Kinetic features of the synthesis of polymers with terminal functional groups in the presence of redox systems 5, 1111
Kinetic features, study of the - of emulsion copolymerization of vinylidene fluoride with hexafluoropropylene 11, 2714
Kinetic patters of the disruption of macromolecules in polypropylene under load 10, 2361
Kinetic regularities, effect of conditions of polymerization on - of thermal degradation of crosslinked polyether methacrylates 4, 1013
Kinetic regularities of decomposition of benzoyl peroxide in polystyrene medium 6, 1504
Kinetic scheme, analysis of the special aspects of the - of radical polymerization of methyl methacrylate for high degrees of monomer conversion 1, 49
Kinetic study of the mechanism of chain propagation in alternating copolymerization of styrene and methyl-α-chloracrylate in the presence of diethylaluminium chloride 11, 2819
Kinetics, a study of the - of phase layer separation in polymer–crystallizable plasticizer systems 11, 2674
Kinetics, analysis of the - and mechanism of polymerization of N,N′-4,4′-diphenylmethane-bis-maleimide and 4,4′-diaminodiphenylmethane 2, 404
Kinetics and mechanism of decay of compounds containing carbonate bonds in alkaline media 2, 373
Kinetics and mechanism of high-temperature pyrolysis of polyacrylonitrile 4, 958
Kinetics of alternating copolymerization of allylphenyl and allylcyclohexyl ethers with maleic anhydride 11, 2806

Kinetics of homopolycondensation of a bisecondary aromatic glycol in the presence of an acidic catalyst 5, 1246
Kinetics, comparative study of - of thermo-oxidative degradation of poly-4-methyl-pent-1-ene and polypropylene (isotropic and oriented films) 4, 967
Kinetics of chemical stabilization of polyvinyl chloride 8, 1835
Kinetics of oxidative polymerization inhibited by antioxidants. Limiting concentrations of antioxidants, critical rate initiation and critical concentration of monomer 2, 282
Kinetics of the reactions of isocyanates with polyoxypropylene glycols 6, 1351
Kinetics of the thermooxidative degradation of *cis*-1,4-polyisoprene in bulk in the presence of phenol antioxidants 5, 1198
Kinetics, on the - of ozone absorption by elastomers of various structures 8, 1993
Kinetics, on the - of the reversible repolyamidation of polycaproamide below the melting point of the polymer 5, 1222
Kinetics, study of - and the mechanism of graft polymerization of dimethylamino-ethyl methacrylate on polycaproamide in the presence of reversible initiating systems 5, 1271
Kinetics, the - of secondary reaction in a network polymer based on aromatic diamines and aromatic epoxides 9, 2320
Kinetics, viscometry and - of initial stages of curing polyurethanes 9, 2270

Lactam polymerizations, study of features of - initiated by transition metal oxides 12, 3032
Ladder type polyheteroarylenes, formation of morphological structure in - synthesized by solid-phase polycondensation 3, 727
Lanthanide shift reagents, use of - for analysing the microstructure of polydienes and polyalkenamers by ^{1}H-NMR spectroscopy 5, 1104
Layer, the structure of the aged - in polyvinylchloride photodegraded in the presence of oxygen 1, 91
Lewis acid, reactivity of functional groups of - nitrate esters of cellulose in the presence of - 9, 2144
Light absorption, the effect of stabilizers on the chain photo-oxidation of polyamides under conditions of weak and strong - 4, 897
Ligh-protective effectiveness, concentration dependency of the - of antioxidants in polymers 6, 1400
Light scattering and viscosity of solutions of poly-*p*-(2-cyanophenylene)terephthalamide in sulphuric acid 3, 685
Light scattering of solutions of polyamidohydrazide and conformation characteristics of its molecules 9, 2221
Lignins, influence of the polyelectrolyte nature of - and lignocarbohydrate complexes on their elution behaviour during exclusion liquid chromatography on porous silicas in N,N-dimethyl formamide 4, 783
Lignocarbohydrate complexes, influence of the polyelectrolyte nature of lignins and - on their elution behaviour during exclusion liquid chromatography on porous silicas in N,N-dimethyl formamide 4, 783
Linear and crosslinked polyvinylbenzylamine and certain of its physico-chemical properties 8, 1927
Linear polyethylene lamellae, structure of non-ordered regions in - 4, 805
Linear polyurethanes, study of the formation of - using polyoxypropylene glycols 10, 2535
Liquid adsorption chromatography, analysis of molecular weight distribution of bis-phenol epoxide resins by - 1, 247

Liquid and amorphous-crystalline phase separation processes, features of - in block copolymers and in mixtures with variable molecular weights **2,** 395
Liquid chromatography of low molecular weight polybutadienes **1,** 57
Liquid-crystalline orderliness, influence of length of the aliphatic group on the character of - in polymers with phenyl benzoate side groups **4,** 789
Liquid-crystalline polymers, 1-st All-Union symposium on - **7,** 1808
Liquid crystalline state of polymers with rigid and flexible portions alternating along the chain **12,** 2926
Liquid media, effect of the chemical structure of - on microcrack formation in crystalline polyolefins undergoing deformation **3,** 755
Liquid media, the durability and deformation behaviour of polybutadiene under uniaxial stretching in - **4,** 916
Low density polyethylene, structural-mechanical features of two-stage shear strain of oriented - **3,** 621
Low frequency skeletal vibrations, link between - in glassy polymers and equilibrium rigidity of macromolecules **7,** 1597
Low-molecular weight components, method for determining the rate of solution, coefficient of diffusion and adsorption of solid - in filled elastomers **10,** 2589
Low molecular weight compounds, calculation of excess entropy of mixing of - with melts of heterochain polymeric and dimeric compounds and the entropy contribution of macromolecules in the liquid **1,** 98
Low molecular weight compounds, study of the mobility of - in various polymer matrices using the fluorescene method **4,** 1020
Low molecular weight particles, dependence on pressure of the diffusion coefficients of - in a polymer **11,** 2664
Low molecular weight polybutadienes, liquid chromatography of - **1,** 57
Low-molecular weight rubber, study of epoxide polymers based on resorcinol diglycidyl ether modified by - **12,** 2947
Low molecular weight substance, aspects of self-diffusion of solvent in polymer– - system **8,** 1883
Luminescence spectra, absorption and - of poly(N,N′-bis-phenoxyphenyl)pyromellitimide, the initial polyamic acid and some model compounds **5,** 1264

Macromolecular crosslinking, inhibition of - during the degradation of polyvinylchloride **4,** 850
Macromolecule, conformation of the isolated - of chitin **4,** 936
Macromolecules, calculation of excess entropy of mixing of low molecular weight compounds with melts of heterochain polymeric and dimeric compounds and the entropy contribution of - in the liquid **1,** 98
Macromolecules, influence of the hydrodynamic interaction on the viscoelastic properties of solutions of - in the high frequency region **5,** 1087
Macromolecules, kinetic patterns of the disruption of - in polypropylene under load **10,** 2361
Macromolecules, link between low frequency skeletal vibrations in glassy polymers and equilibrium rigidity of - **7,** 1597
Macromolecules, modelling of the structure of polyunsaturated - **3,** 629
Macromolecules, some problems of the theory of polymer-analogous and intramolecular reactions of -. Review **11,** 2603
Macromolecules, study of the conformational structure of - under stretching. Results of the computer simulation and of IR spectroscopy **7,** 1756

Macromolecules, the behaviour of - of styrene–acrylonitrile–methyl methacrylate terpolymers in solutions 9, 2276
Macromolecules, towards a theory of the coil–globule transition in comb-like - 6, 1370
Magnetic fields, thermotropic liquid crystalline polymers in elastic and - . Review 12, 2863
Magnetic relaxation, molecular movement and - of ^{13}C-nuclei of organic ions in the ion exchange resin phase 11, 2655
Maleic anhydride, complex formation in the radical copolymerization of some vinyl ketones with - 7, 1723
Maleic anhydride, kinetics of alternating copolymerization of allylphenyl and allylcyclohexyl ethers with - 11, 2806
Maleic anhydride, synthesis and properties of hydrolyzed polymers of - 9, 2254
Maleic anhydride, synthesis of alternating and random copolymers of ethylene with - 9, 2151
Manganese (III) tris-acetyl acetonate, mechanism of initiation of polymerization of vinyl monomers by - –carboxylic acid systems in an aqueous medium 5, 1074
Mass transfer, experimental study of - of some model and drug substances across microporous polymer membranes in aqueous solutions 4, 830
Mass transfer, mechanism of sorption and - of sulphur dioxide 10, 2405
Mechanical disruption, role of charged particles and relaxation phenomena in the course of - of polymer dielectrics in a strong electric field 4, 838
Mechanochemical processes, IR spectroscopic study of - in polymers stimulated by orientation stretching 4, 816
Mechanoemission centres, distribution of - on the surface of strained polymers 12, 3047
Medicinal polymers, I All-Union school-seminar on - 5, 1286
Melting, crystallization and - of filled 1,4-*cis*-polybutadiene 11, 2787
Melting, the effect of an aerosil on - and crystallization of unvulcanized blends and vulcanizates based on the siloxane rubber, SKTFV 3, 603
Melts, influence of the defective boundary layer on nucleation during crystallization of oriented polymer - 2, 294
Mercaptans, chain transfer reactions by aliphatic - in the high-temperature polymerization of methylmethacrylate 10, 2414
Mesogenic groups, infrared investigation of the orientational properties of a thermotropic liquid crystalline polymer with side - 3, 722
Mesogenic groups, molecular properties and phase conditions of polymers with - in the main chain 5, 1253
Metal ions, characteristics of binding of - with polymeric ligands 1, 81
Metal oxides, study of features of lactam polymerizations initiated by transition - 12, 3032
Metals, electrochemical preparation of polymer films on - from aqueous solutions of acrylamide and formaldehyde 8, 1980
Metals, study of the adhesion of polyethylene to - at cryogenic temperatures 2, 412
Methacrylate, the structural features of smectic ordering in polymers with an acrylate and - main chain 3, 614
Methacrylate methyldiethoxymethyl silane, influence of the electrode potential and of solvents on the process of polymer film formation during the electrochemically initiated polymerization of - 9, 2188
Methacrylonitrile, dilatometric study of the solution copolymerization of 1,1,5-trihydroperfluoroamyl acrylate and - 12, 3059
Methacrylonitrile, role of complex formation during the homo- and copolymerization of - and acrylic acid in dimethyl sulphoxide–water solutions 7, 1730
Methanol, effect of surface tension of the solvent on the duration of the induction period of diffusion in the - –PMMA system 8, 1878

Method of deformation difference, evaluation of the mechanical serviceability of of polymers according to data of non-isothermal stress relaxation using the - 10, 2593
Methyl benzenes, limitation of the growing chain during polymerization of isobutylene in the presence of - 2, 257
Methyl-α-chloracrylate, kinetic study of the mechanism of chain propagation in alternating copolymerization of styrene and - in the presence of diethylaluminium chloride 11, 2819
2-Methylenespiro-orthoesters in polymerization and copolymerization reactions 4, 857
Methyl-α-fluoroacrylate, mechanism of radiation grafting of - and α,β,β-trifluorostyrene to a perfluorinated copolymer 4, 946
Methyl methacrylate, analysis of the special aspects of the kinetic scheme of radical polymerization of - for high degrees of monomer conversion 1, 49
Methylmethacrylate, chain transfer reactions by aliphatic mercaptans in the high-temperature polymerization of - 10, 2414
Methyl methacrylate, chemical inhomogeneity of terpolymers of styrene with acrylonitrile and - 6, 1337
Methyl methacrylate, copolymerization of 1-vinyl-1,2,4-triazole with - and styrene 1, 15
Methylmethacrylate, molecular characteristics of triple copolymers of styrene with acrylonitrile and - in dilute solutions 12, 2889
Methyl methacrylate, on the termination mechanism in the radical polymerization of - at high conversions 10, 2528
Methyl methacrylate, the behaviour of macromolecules of styrene-acrylonitrile– - terpolymers in solution 9, 2276
Methylstyrene, multiplicity of relaxation transitions in butadiene– - copolymers 2, 358
Microanalysis, consideration of instrumental expansion in order to restore concentration profiles using electron-probe - in polymer–polymer systems 3, 766
Microcalorimeter type DSM-2M for use in the study of polymers 12, 3053
Microcalorimetric method, study of nascent polyethylenes of varied molecular weight by the - 3, 567
Microcrack formation, effect of the chemical structure of liquid media on - in crystalline polyolefins undergoing deformation 3, 755
Microdiffusion, tunnel mechanism of - of free radicals in solid organic substances 11, 2769
Microphasic structure of oligoesteracrylate networks obtained in a medium of different solvents by the mechanism of anionic polymerization 10, 2395
Microporous polymer membranes, experimental study of mass transfer of some model and drug substances across - in aqueous solutions 4, 830
Microstructure, calculation of the - of products of homogeneous chlorination of polyvinyl chloride 6, 1356
Microstructure, use of lanthanide shift reagents for analysing the - of polydienes and polyalkenamers by ^{1}H-NMR spectroscopy 5, 1104
Microvoids, on the photochemical decay of anthracene dimers in a study of - in solid polymethylmethacrylate 10, 2520
Molecular and hydrodynamic characteristics of an aromatic polysulphone obtained by electrophilic substitution 10, 2375
Molecular characteristics, change in the - of butyl rubber during chlorination 8, 1960
Molecular characteristics, compositional inhomogeneity and other - of chlorinated polyvinyltrimethylsilane 2, 379
Molecular characteristics, gel chromatographic analysis of the - of polycarbonate 11, 2647
Molecular characteristics of graft copolymers of cellulose diacetate and polystyrene 6, 1364
Molecular characteristics of triple copolymers of styrene with acrylonitrile and methylmethacrylate in dilute solutions 12, 2889

Molecular characteristics, the - and properties of dilute solutions of *trans*-polypentenamers 11, 2721
Molecular characteristics, use of thin-layer chromatography for the study of - of oligoarylates 11, 2859
Molecular dynamics, effect of pressure on - of spin probes in polyethylene 4, 977
Molecular mechanism, the - of shrinkage of polyethylene terephthalate 3, 672
Molecular mobility, effect of tensile stress on the - of oriented amorphous-crystalline polymers 11, 2845
Molecular mobility, local concentration of units and - in swollen polymer networks 9, 2128
Molecular mobility, study of the influence of carbon filler on the - and structure of polyamide-12 11, 2633
Molecular movement and magnetic relaxation of ^{13}C-nuclei of organic ions in the ion exchange resin phase 11, 2655
Molecular network, structure and properties of epoxide-amine - 8, 1856
Molecular orientation, on the - of polyethylene terephthalate 2, 333
Molecular properties and phase conditions of polymers with mesogenic groups in the main chain 5, 1253
Molecular structure and physical properties of rigid chain polymers in solution. Review 8, 1815
Molecular structure, the - of polymetaphenylene isophthalamide solutions 4, 861
Molecular weight, features of liquid and amorphous-crystalline phase separation processes in block copolymers and in mixtures with variable - 2, 395
Molecular weight, influence of current density and composition of solution on the - of a polymer formed on an electrode 9, 2105
Molecular weight, study of nascent polyethylenes of varied - by the microcalorimetric method 3, 567
Molecular weight characteristics, study of - of polysulphone by gel chromatography 2, 438
Molecular weight distribution, analysis of - of bis-phenol epoxide resins by liquid adsorption chromatography 1, 247
Molecular weight distribution and topological features of some systems of emulsion polymerization 2, 426
Molecular weight distribution in "live" polymerization complicated by rheokinetic effects 2, 503
Molecular weight distribution of the products of regulated polymerization on catalysts containing two types of mutually transforming active centres 2, 303
Molecular weight distribution, spectroturbidimetric determination of the - of poly-α-methylstyrene 5, 1279
Molecular weight distribution, study of the - and structure of oligomers prepared by alkylation of toluene with epichlorohydrin 1, 129
Molecular weight distribution, study of the - of boron-siloxane polymers by gel permeation chromatography 1, 1
Molecular weights, the influence of pressure on nucleation during crystallization from the melt of oligoesters of various - 7, 1639
Molecules, a conformational analysis of polyunsaturated - in solution. Continuum model 3, 638
Molecules, diffusional mobility of chain - 3, 555
Molecules, hydrodynamic properties and conformation characteristics of - of cellulose nitrates with varying nitrogen content 9, 2212
Molecules, interaction of protein - with a network polyelectrolyte in solution 8, 1850

Molecules, light scattering of solutions of polyamidohydrazide and conformation characteristics of its - 9, 2221
Monomer, a study of complex formation between polydienyl lithium chains and electron donors in a hydrocarbon medium in the presence of the - 4, 870
Monomer, kinetics of oxidative polymerization inhibited by antioxidants. Limiting concentrations of antioxidants, critical rate of initiation and critical concentration of - 2, 282
Monomer conversion, analysis of the special aspects of the kinetic scheme of radical polymerization of methyl methacrylate for high degrees of - 1, 49
Monomers, kinetic features of radical polymerization of - of N,N-dialkyl-N,N-diallylammonium chloride series 3, 748
Monomers, mechanism of initiation of polymerization of vinyl - by manganese (III) tris-acetyl acetonate–carboxylic acid systems in an aqueous medium 5, 1074
Monomers, mechanism of the inhibition of polymerization of vinyl - initiated by benzoyl peroxide by stable nitroxide radicals 10, 2497
Monomers, study of the initiation mechanism of post-radiation graft polymerization of vinyl - on solid inorganic materials 2, 495
Monomers, the study of photo-initiated graft polymerization of vinyl - on inorganic materials 9, 2314
Monte Carlo method, study of the conformational elasticity of polymer chains based on the - 7, 1747
Morphological structure, formation of - in ladder type polyheteroarylenes synthesized by solid-phase polycondensation 3, 727
Morphology of polyallomers 3, 701
Morphology, preparation and - of polyelectrolyte complex coatings based on polyacrylic acid and polyethylene imine 6, 1444
Mutually transforming active centres, molecular weight distribution of the products of regulated polymerization on catalysts containing two types of - 2, 303

N-acetylpolyurethanes, certain properties of - 10, 2425
Network polymers, calculation of the glass transition temperature of - and determination of the chain fragment between crosslinks 1, 64
Nitrate esters, reactivity of functional groups of - of cellulose in the presence of Lewis acids 9, 2144
Nitrate fibres, method for preparing samples for the X-ray study of oriented flax - 4, 1025
Nitrogen, hydrodynamic properties and conformation characteristics of molecules of cellulose nitrates with varying - content 9, 2212
Nitrogen and phosphorus-containing polyampholytes based on polyvinylbenzylamine 11, 2705
Nitrogen containing diamines and dianhydrides, heat stability of polyimides based on - 5, 1097
Nitroxide radicals, mechanism of the inhibition of polymerization of vinyl monomers initiated by benzoyl peroxide by stable - 10, 2497
NMR free induction signal, determining the phase structure of fluoroplastics using the - 5, 1259
NMR method, study of branched oligoesters and crosslinked polyurethane elastomer by the - 2, 264
NMR spectroscopy, study of the structure of branched oligoesters by - 6, 1579
NMR study, an - of fluorine-containing copolycarbonates 11, 2687
N,N-dialkyl-N,N-diallylammonium chloride, kinetic features of radical polymerization of monomers of - series 3, 748

2-N,N-dimethylaminophenazine, photopolymerization of butyl methacrylate in the presence of benzophenone sensitized by - **5,** 1186
N,N-dimethyl formamide, influence of the polyelectrolyte nature of lignins and lignocarbohydrate complexes on their elution behaviour during exclusion liquid chromatography on porous silicas in - **4,** 783
N,N′-4,4-diphenylmethane-bis-maleimide, analysis of the kinetics and mechanism of polymerization of - and 4,4′-diaminodiphenylmethane **2,** 404
N,N′-*m*-phenylene dimaleimide, sensitization of radiation-chemical crosslinking of - **12,** 2935
***n*-Octyl methacrylate,** thermodynamics of statistical copolymers of - and N-vinyl carbazole **5,** 1055
Non-isothermal stress relaxation, evaluation of the mechanical serviceability of polymers according to data of - using the method of deformation difference **10,** 2593
Non-equilibrated polycondensation processes, the applicability of a statistical approach to a description of - **11,** 2679
Non-ordered regions, structure of - in linear polyethylene lamellae **4,** 805
Non-oriented polyfluorenepyromellitimide films, supermolecular structure of - **2,** 311
Non-stoichiometric polyelectrolyte complexes, the formation reactions of - **9,** 2296
Norbornylene rings, synthesis of polyarylates with - in the chain **8,** 2039
Nucleation, influence of the defective boundary layer on - during crystallization of oriented polymer melts **2,** 294
Nucleation, the influence of pressure on - during crystallization from the melt of oligoesters of various molecular weights **7,** 1639
N-vinyl carbazole, thermodynamics of statistical copolymers on *n*-octyl methacrylate and - **5,** 1055

OH groups, association of - in a solution of oligooxyoctene triol in α,ω-hydroxyoligobutadiene **6,** 1461
OH-groups, intramolecular association of end - with the π-electrons of double bonds in hydroxy-oligobutadienes **8,** 1913
α-Olefines, ^{13}C NMR spectroscopy of products of cometathesis of cycloctadiene-1,5 and - **3,** 589
α-Olefines, secondary reactions occurring on cometathesis of cyclo-octadiene-1,5 and - in presence of the catalyst $W(OR)_2Cl_4$–$Al_2(iso\text{-}Bu)_3Cl_3$ **10,** 2370
Oligoarylates, use of thin-layer chromatography for the study of molecular characteristics of - **11,** 2859
Oligodiamines, synthesis and properties of sulphur-containing - and epoxide polymers on their basis **6,** 1523
Oligoester, investigation of the thermal stability of an - crystallized in thin interlayers **12,** 2964
Oligoesteracrylate, sorption of water and phase structure of polyvinylchloride–plasticizer and - systems **5,** 1240
Oligoesteracrylate networks, microphasic structure of - obtained in a medium of different solvents by the mechanism of anionic polymerization **10,** 2395
Oligoesteracrylates, a study of the process of formation of - **5,** 1162
Oligoesters, study of branched - and crosslinked polyurethane elastomer by the NMR method **2,** 264
Oligoesters, study of the structure of branched - by NMR spectroscopy **6,** 1579
Oligoesters, the influence of pressure on nucleation during crystallization from the melt of - of various molecular weights **7,** 1639

Oligoetheracrylate, diffusion in polyvinyl chloride– - systems 1, 190
Oligohydroxyarylenes, features of the oxidation of - in an alkaline medium 4, 903
Oligoisoprene dihydrazides, structure of network polymers based on - and an epoxide oligomer 5, 1063
Oligomer, mechanism of formation of adhesion bonds between an elastomer and phenolformaldehyde - 2, 433
Oligomer, structure of network polymers based on oligoisoprene dihydrazides and an epoxide - 5, 1063
Oligomeric ionenes and their reactions with synthetic polyacids 6, 1436
Oligomeric polyoxyethylene glycols, the complexing of - of various molecular weight with copper β-diketonates 11, 2696
Oligomers, achievements in the synthesis of reactive hydrocarbon - with terminal functional groups. Review 10, 2341
Oligomers, adsorption of - containing functional groups on a porous adsorbent 6, 1414
Oligomers, study of the formation of epoxy-containing - and network polymers. Model reactions of phenols with glycidyl ethers catalyzed by aliphatic and hetero-aromatic amines 4, 1002
Oligomers, study of the molecular weight distribution and structure of - prepared by alkylation of toluene with epichlorohydrin 1, 129
Oligoorganosilane, crosslinking of polydimethylvinyl siloxane rubber by - with functional groups at the silicon atom 5, 1192
Oligoorganosiloxane, investigation of - based on exclusion liquid chromatography and spectroturbidimetric titration 12, 3017
Oligooxyoctene triol, association of OH groups in a solution of - in α,ω-hydroxyoligobutadiene 6, 1461
Oligoperoxides, polymerization of styrene and isoprene initiated by - containing perester and diacyl peroxide groups 9, 2138
Oligo-*p*-methacrylates, structure of densely crosslinked polymers of dimethacrylates and - 9, 2111
Optical and photooptical properties, the solid phase polymerization of 1,4-bis-(*m*-acetylamino phenyl) butadiyne and the - of the polymer 9, 2290
Optical properties, certain - of pseudoencapsulated cholesteric films based on polyurethanes 11, 2641
Organic ions, molecular movement and magnetic relaxation of ^{13}C-nuclei of - in the ion exchange resin phase 11, 2655
Organic solvent, concerning the conformation of an aromatic polyamide in an - and in concentrated sulphuric acid according to flow-birefringence data 8, 1906
Organocyclosiloxanes, interaction of diethylphosphite and diethylphosphine oxide with vinyl-containing - 2, 420
Organolithium active sites, polymerization of the butadiene–styrene system under the action of - in the presence of subcatalytic quantities of tetramethylenediamine 10, 2464
Organomagnesium compounds, the use of - and alkyl-aluminium-magnesium complexes in a Ziegler catalyst for the synthesis of *cis*-1,4-polyisoprene 10, 2442
Organosilicon gels, rheological properties of electrically controlled - 11, 2780
Organosiloxanes, structure of cyclolinear - 7, 1625
Organotin polymers, synthesis and structure of - 10, 2389
Orientation angles, flow birefringence and - in poly-α-methylstyrene solutions 8, 1890
Orientation ordering in solutions of polymer chains with rotational-isomeric mechanism of flexibility 5, 1230

Orientational properties, infrared investigation of the - of a thermotropic liquid crystalline polymer with side mesogenic groups 3, 722
Oriented flax nitrate fibres, method for preparing samples for the X-ray study of - 4, 1025
Oxidation, applicability of the method of the photochemical after-effect to studying - of polymers 1, 253
Oxidation, effect of tetrahydrofuran on radiation-induced and thermal - of polyvinyl chloride 3, 775
Oxidation, features of the - of oligohydroxyarylenes in an alkaline medium 4, 903
Oxidation, mechanism of C—C bond opening during the initiated - of *cis*-polyisoprene in bulk 4, 909
Oxidation, on the influence of dispersed oxides on the radiation induced - of polyethylene 10, 2485
Oxidation, the diffusional regime in the initiated - of polymers 6, 1384
Oxidative polymerization, kinetics of - inhibited by antioxidants. Limiting concentration of antioxidants, critical rate initiation and critical concentration of monomer 2, 282
α-Oxides, a ^{19}F NMR study of the direction of opening of the epoxide ring in the uncatalyzed reaction of - with phenols and alcohols 7, 1653
α-Oxides, the radiochemical and thermochemical cure of compositions based on - 5, 1121
Oxidizing medium, breakdown mechanism of stressed polypropylene in - . Structural effects 10, 2542
Oxidizing medium, principal possibility of strength reinforcement of polypropylene during uniaxial elongation in an - 8, 2029
Oxygen, the structure of the aged layer in polyvinylchloride photodegraded in the presence of - 1, 91
Oxygen molecule, formation of quasi-stable radical pairs exchanging an - in polymer layers 7, 1617
Ozone absorption, on the kinetics of - by elastomers of various structures 8, 1993
Ozonization, some aspects of the - of isobutylene copolymers with isoprene in solution 8, 1871
Ozonolysis, investigation of polystyrene–polybutadiene block-copolymers by gel-permeation chromatography and by - 12, 2986

Pentadecalolactone, thermodynamics of - , of the process of its polymerization and of the resultant polypentadecanolactone in the 0–400 K region 8, 1951
Perester and diacyl peroxide groups, polymerization of styrene and isoprene initiated by oligoperoxides containing - 9, 2138
Perfluoralkane glassy matrix, radiation polymerization of vinylchloride in a - 8, 1921
Perfluorinated copolymer, mechanism of radiation grafting of methyl-α-fluoroacrylate and α,β,β-trifluorostyrene to a - 4, 946
Peroxide and anhydride groups, the synthesis of heterofunctional polymers with - 5, 1152
Phase composition, the - of polyblock block-copolymers of polyarylene sulphonoxide and polyethylene oxide 9, 2326
Phase conditions, molecular properties and - of polymers with mesogenic groups in the main chain 5, 1253
Phase diagram, generalized polymer–solvent - 3, 573
Phase diagrams, the possibility of using the interference micromethod for plotting - of polymer–crystallizing plasticizer systems 2, 520
Phase equilibrium, the heat of interaction of polyvinylchloride with plasticizers, the kinetics of swelling and - 7, 1668

Phase layer separation, a study of the kinetics of - in polymer–crystallizable plasticizer systems 11, 2674
Phase structure, determining the - of fluoroplastics using the NMR free induction signal 5, 1259
Phase structure, sorption of water and - of polyvinylchloride–plasticizer and oligoesteracrylate systems 5, 1240
Phase structure, the mechanism of formation of - of epoxide–rubber systems 9, 2305
Phenol, effect of the nature of the solvent on the catalytic stage in the condensation of - with acetaldehyde 12, 2958
Phenol antioxidants, kinetics of the thermooxidative degradation of *cis*-1,4-polyisoprene in bulk in the presence of - 5, 1198
Phenolformaldehyde oligomer, mechanism of formation of adhesion bonds between an elastomer and - 2, 433
Phenols, a ^{19}F NMR study of the direction of opening of the epoxide ring in the uncatalysed reaction of α-oxides with - and alcohols 7, 1653
Phenols, investigation of the reaction of - with hexamethylene tetramine using a gas evolution technique 8, 1945
Phenols, study of the formation of epoxy-containing oligomers and network polymers. Model reactions of - with glycidyl ethers catalyzed by aliphatic and hetero-aromatic amines 4, 1002
Phenyl benzoate side groups, influence of the length of the aliphatic group on the character of liquid-crystalline orderliness in polymers with - 4, 789
Phosphoric acid esters, interaction of - with carbonyl groups in polyethylene 6, 1513
Phosphorus-containing polyampholytes, nitrogen and - based on polyvinylbenzylamine 11, 2705
Phosphorus-containing rubber vulcanization accelerators, synthesis and mechanism of the action of - 1, 19
Phosphorus-containing urethane block copolymers, study of the thermal and viscoelastic properties of - 6, 1328
Photoactive additives, free-radical transformations of polyethyleneterephthalate initiated by - 1, 167
Photochemical after-effect, applicability of the method of the - to studying oxidation of polymers 1, 253
Photochemical decay, on the - of anthracene dimers in a study of microvoids in solid polymethyl methacrylate 10, 2520
Photoelastic properties, study of - of films of styrene–butadiene ternary block copolymers 7, 1766
Photo-initiated graft polymerization, the study of - of vinyl monomers of inorganic materials 9, 2314
Photooptical properties, the solid phase polymerization of 1,4-bis-(*m*-acetylamino phenyl) butadiyne and the optical and - of the polymer 9, 2290
Photo-oxidation, the effect of stabilizers on the chain - of polyamides under conditions of weak and strong light absorption 4, 897
Photophysical properties of modified poly-N-epoxypropyl carbazole 12, 2910
Photopolymerization of butyl methacrylate in the presence of benzophenone sensitized by 2-N,N-dimethylaminophenazine 5, 1186
Phthalation reaction, polarographic study of the reactivity of the amine and hydrazide groups in the - 4, 844
Physical and chemical deactivation, the relative roles of - of propagating chains during the anionic polymerization of acrylonitrile in a hydrocarbon medium 9, 2285

Physical properties, molecular structure and - of rigid chain polymers in solution. Review 8, 1815
Physico-chemical and technological parameters, some features of relationships between - in the orientation of polyethylene terephthalate films 11, 2739
Physico-chemical properties, linear and crosslinked polyvinylbenzylamine and certain of its - 8, 1927
Physico-chemical properties, use of accessibility as determined by H→D isotope exchange for the study of - of aliphatic polyamides 11, 2813
Physico-mechanical properties of polyarylate–polybutadiene and polysulphone–polybutadiene block copolymers 10, 2561
Pigment, modification of non-stretched polypropylene shrinkage fibres by addition of micro-quantities of stearates and lightly dispersed - 8, 2055
Plastic deformation, the effect of annealing on the mechanism of - of oriented polypropylene 3, 692
Plasticizer, a study of the kinetics of phase layer separation in polymer–crystallizable - systems 11, 2674
Plasticizer, sorption of water and phase structure of polyvinylchloride– - and oligoesteracrylate systems 5, 1240
Plasticizers, the heat of interaction of polyvinylchloride with - , the kinetics of swelling and phase equilibrium 7, 1668
Plastics, mechanism of increasing the impact strength of - using rubber despersions 4, 985
PMMA, effect of surface tension of the solvent on the duration of the induction period of diffusion in the methanol– - system 8, 1878
PMR line shape, the - in crosslinked polymeric gels 12, 3039
Polar substituents, anionic non-equilibrium copolymerization of hexaorganylcyclotrisiloxanes with - at the silicon atom 12, 2899
Polarization, dielectric - on hydration of crosslinked polystyrene aminodiacetic acid 8, 1845
Polarographic study of the reactivity of the amine and hydrazide groups in the phthalation reaction 4, 844
Polyacids, oligomeric ionenes and their reactions with synthetic - 6, 1436
Polyacrylamide, viscometric properties of dilute solutions of hydrolyzed - 10, 2380
Polyacrylates, effect of steric factors on the possibility of thermal rearrangement in side groups of silicon-containing - 9, 2230
Polyacrylic acid, intermacromolecular amidization in dilute aqueous solution of a polyelectrolyte complex of - and linear polyethylene imine 7, 1771
Polyacrylic acid, preparation and morphology of polyelectrolyte complex coatings based on - and polyethylene imine 6, 1444
Polyacrylic acid, structure and properties of polyelectrolyte complexes of - and polymeric heterocyclic amines 11, 2796
Polyacrylic acid, the thermodynamics of formation of polycomplexes of - with polyvinyl alcohol and polyethylene oxide 7, 1631
Polyacrylonitrile, kinetics and mechanism of high-temperature pyrolysis of - 4, 958
Polyalkenamers, use of lanthanide shift reagents for analysing the microstructure of polydienes and - by ^{1}H-NMR spectroscopy 5, 1104
Polyallomers, morphology of - 3, 701
Polyamic acid, absorption and luminescence spectra of poly(N,N′-bis-phenoxyphenyl) pyromellitimide, the initial - and some model compounds 5, 1264
Polyamic acids, the influence of thermal treatment conditions on features of the chemical structure in the imidization of - and on the thermal stability of the polyimide products 3, 663

Polyamide, concerning the conformation of an aromatic - in an organic solvent and in concentrated sulphuric acid according to flow-birefringence data **8,** 1906
Polyamide-12, study of the influence of carbon filler on the molecular mobility and structure of - **11,** 2633
Polyamides, effect of chemical structure of aromatic - on sorption capacity towards ammonia **9,** 2236
Polyamides, the effect of stabilizers on the chain photo-oxidation of - under conditions of weak and strong light absorption **4,** 897
Polyamides, the synthesis and study of unsaturated - **11,** 2728
Polyamides, thermooxidative degradation of components based on aromatic - **6,** 1475
Polyamidohydrazide, light scattering of solutions of - and conformation characteristics of its molecules **9,** 2221
Poly-*p*-aminophenylacetylene, study of acidic-basic properties of aminoazo-compounds obtained from - **2,** 457
Polyampholytes, nitrogen and phosphorus-containing - based on polyvinylbenzylamine **11,** 2705
Polyarylate, physico-mechanical properties of - -polybutadiene and polysulphone–polybutadiene block copolymers **10,** 2561
Poly-(arylate-arylene sulphonoxide) block-copolymers, properties of solutions of - **7,** 1778
Polyarylates, electrical effects by the action of low energy electrons on - **4,** 994
Polyarylates, synthesis of - with norbornylene rings in the chain **8,** 2039
Polyarylene sulphonoxide, the phase composition of polyblock block-copolymers of - and polyethylene oxide **9,** 2326
Polybenzoxazole, a study of the regularities in viscoelastic behaviour of heat-resistant polymers under conditions of creep, exemplified by - **7,** 1659
Polyblock block-copolymers, the phase composition of - of polyarylene sulphonoxide and polyethylene oxide **9,** 2326
Polybutadiene, action of sulphur dioxane on block copolymers containing - and polydimethylsiloxane **2,** 275
Polybutadiene, investigation of polystyrene– - block-copolymers by gel-permeation chromatography and by ozonolysis **12,** 2986
Polybutadiene, physico-mechanical properties of polyarylate– - and polysulphone–polybutadiene block copolymers **10,** 2561
Polybutadiene, sorption, structure and thermodynamic stability of polysulphone– - block copolymers **10,** 2571
Polybutadiene, the durability and deformation behaviour of - under uniaxial stretching in liquid media **4,** 916
Polybutadienes, liquid chromatography of low molecular weight - **1,** 57
Polybutyl methacrylate, structure and properties of - obtained by polymerization in the presence of aerosil **6,** 1484
Polycaproamide, influence of loading and change in termperature on the parameters of the crystalline lattice of - **1,** 42
Polycaproamide, on the kinetics of the reversible repolyamidation of - below the melting point of the polymer **5,** 1222
Polycaproamide, study of kinetics and the mechanism of graft polymerization of diethylaminoethyl methacrylate on - in the presence of reversible initiating systems **5,** 1271
Polycarbonate, gel chromatographic analysis of the molecular characteristics of - **11,** 2647
Polychelates of erbium and ytterbium prepared from tetraacetyl ethane **10,** 2512
Polychloro(diphenylenesulphides), synthesis and thermal properties of reactive - **8,** 2049
Polychloroprene, on the multiplicity of relaxation processes of recrystallized - **8,** 1987

Polycomplexes, the thermodynamics of formation of - of polyacrylic acid with polyvinyl alcohol and polyethylene oxide 7, 1631
Polycondensation, formation of morphological structures in ladder type polyheteroarylenes synthesized by solid-phase - 3, 727
Polycondensation, intensification of the final stage of - during synthesis of linear polymers 3, 582
Polycondensation, IX international symposium on - 8, 2079
Polycondensation, study of - of furfuryl alcohol with formaldehyde catalyzed by acids 1, 228
Polycondensation processes, the applicability of a statistical approach to a description of non-equilibrated - 11, 2679
Polycyanoamides, synthesis and properties of certain - 6, 1394
Poly-*p*-(2-cyanophenylene)terephthalamide, light scattering and viscosity of solutions of - in sulphuric acid 3, 685
Polycyclodehydration, study of reactions of solid-phase thermal - in stepwise synthesis of polynaphthoylene benzimidazoles 3, 735
Polydienes, use of lanthanide shift reagents for analysing the microstructure of - and polyalkenamers by ^{1}H-NMR spectroscopy 5, 1104
Polydienyl lithium chains, a study of complex formation between - and electron donors in a hydrocarbon medium in the presence of the monomer 4, 870
Poly-N,N′-diethylaminoethyl methacrylate, study of the interaction of - with polysilicic acid sols 7, 1605
Polydimethylsiloxane, action of sulphur dioxane on block copolymers containing polybutadiene and - 2, 275
Polydimethylvinylsiloxane rubber, crosslinking of - by oligoorganosilane with functional groups at the silicon atom 5, 1192
Poly-(4′4′-diphenylene)pyromellitimide, quantum-chemical calculation of intermolecular interaction in - 2, 320
Polyelectrolyte, interaction of protein molecules with a network - in solution 8, 1850
Polyelectrolyte complex, intermacromolecular amidization in dilute aqueous solution of a - of polyacrylic acid and linear polyethylene imine 7, 1771
Polyelectrolyte complex coatings, preparation and morphology of - based on polyacrylic acid and polyethylene imine 6, 1444
Polyelectrolyte complexes, structure and properties of - of polyacrylic acid and polymeric heterocyclic amines 11, 2796
Polyelectrolyte complexes, the formation reactions of non-stoichiometric - 9, 2296
Polyelectrolyte nature, influence of the - of lignins and lignocarbohydrate complexes on their elution behaviour during exclusion liquid chromatography on porous silicas in N,N-dimethyl formamide 4, 783
Polyepichlorohydrin, synthesis of copolymers containing 2,5,7-trinitrofluorenone fragments by modification of - . 9, 2161
Poly-N-epoxypropyl carbazole, photophysical properties of modified - 12, 2910
Poly-N-epoxypropylcarbazole, X-ray analysis of - 5, 1138
Polyester, rheological behaviour of melts of a thermotropic mesomorphous - 10, 2455
Polyether methacrylates, effect of conditions of polymerization on kinetic regularities of thermal degradation of crosslinked - 4, 1013
Polyethylene, change in the supermolecular structure of oriented - in the course of short-term heat treatment above the melting point 4, 892
Polyethylene, effect of anisotropy of high-density - on special features of its behaviour on uniaxial elongation 11, 2832
Polyethylene, effect of hexane on the radiothermoluminescence of - 5, 1081

Polyethylene, effect of pressure on molecular dynamics of spin probes in - 4, 977
Polyethylene, homogenization of polypropylene– - mixtures under high pressure and in shear deformation in the presence of acrylamide 1, 174
Polyethylene, interaction of phosphoric acid esters with carbonyl groups in - 6, 1513
Polyethylene, on the influence of dispersed oxides on the radiation induced oxidation of - 10, 2485
Polyethylene, structural-mechanical features of two-stage shear strain of oriented low density - 3, 621
Polyethylene, study of the adhesion of - to metals at cryogenic temperatures 2, 412
Polyethylene, the structure of liquid - : computer simulation and IR spectroscopic data 8, 1937
Polyethylene, theoretical determination of the crystalline structure of - 3, 707
Polyethylene crystallites, temperature dependence of the amplitude of longitudinal vibrations of the lattice of large - 1, 7
Polyethylene films, gas permeability of oriented - 1, 26
Polyethylene graft copolymers, evaluation of the type of grafting and composition of - by the combination of IR spectroscopy and attenuated total internal reflection 5, 1283
Polyethylene imine, intermacromolecular amidization in dilute aqueous solution of a polyelectrolyte complex of polyacrylic acid and linear - 7, 1771
Polyethylene imine, preparation and morphology of polyelectrolyte complex coatings based on polyacrylic acid and - 6, 1444
Polyethylene lamellae, structure of non-ordered regions in linear - 4, 805
Polyethylene oxide, the thermodynamics of formation of polyacrylic acid with polyvinyl alcohol and - 7, 1631
Polyethyleneterephthalate, free-radical transformations of - initiated by photoactive additives 1, 167
Polyethylene terephthalate, on the molecular orientation of - 2, 333
Polyethylene terephthalate, the molecular mechanism of shrinkage of - 3, 672
Polyethylene terephthalate, viscometric study of some structural features of modified - 4, 931
Polyethylene terephthalate films, some features of relationships between physicochemical and technological parameters in the orientation of - 11, 2739
Polyethylenes, study of nascent - of varied molecular weight by the microcalorimetric method 3, 567
Polyfluorenepyromellitimide films, supramolecular structure of non-oriented - 2, 311
Polyheteroarylenes, formation of morphological structure in ladder type - synthesized by solid-phase polycondensation 3, 727
Polyimide, study of regularities of the visco-elastic behaviour of heat-resistant polymers (polyoxadiazole and -) 1, 236
Polyimide films, a study of the mechanical serviceability of - under creep conditions 11, 2732
Polyimide products, the influence of thermal treatment conditions on features of the chemical structure in the imidization of polyamic acids and on the thermal stability of the - 3, 663
Polyimides, heat stability of - based on nitrogen containing diamines and dianhydrides 5, 1097
Polyimides, influence of defects in the chemical structure of - on their thermal stability 8, 1967
Polyisobutylalumoxanes, ring opening polymerization of cyclooctene by catalysts based on tungsten hexachloride and - 6, 1408

Polyisobutylene, kinetic features of the cationic degradation of - 7, 1684
Polyisobutylene, the cationic degradation of - 7, 1676
Polylaevoglucosan, synthesis and properties of - and some of its derivatives. Review 9, 2085
Polymer, a study of the kinetics of phase layer separation in - –crystallizable plasticizer systems 11, 2674
Polymer, aspects of self-diffusion of solvent in - –low molecular weight substance system 8, 1883
Polymer, dependence on pressure of the diffusion coefficients of low molecular weight particles in a - 11, 2664
Polymer, formation of secondary structure in bulk - from heterophase polymerization of vinyl chloride 11, 2852
Polymer, generalized - –solvent phase diagram 3, 573
Polymer, influence of current density and comparison of solution on the molecular weight of a - formed on an electrode 9, 2105
Polymer, infrared investigation of the orientational properties of a thermotropic liquid crystalline - with side mesogenic groups 3, 722
Polymer, on the kinetics of reversible repolyamidation of polycaproamide below the melting point of the - 5, 1222
Polymer, sorption equilibrium in system with - +mixtures of three solvents 12, 2941
Polymer, the kinetics of secondary reaction in a network - based on aromatic diamines aromatic epoxides 9, 2320
Polymer, the possibility of using the interference micromethod for plotting phase diagrams of - crystallizing plasticizer systems 2, 520
Polymer, the solid phase polymerization of 1,4-bis-(*m*-acetylamino phenyl) butadiyne and the optical and photooptical properties of the - 9, 2290
Polymer-analogous and intramolecular reactions, some problems of the theory of - of macromolecules. Review 11, 2603
Polymer-analogue reaction, methods of evaluating individual kinetic constants of an irreversible - , accompanied by the "neighbour" effect using experimental results of traid distribution in reaction products 4, 1026
Polymer breakdown, IV international conference on progress in the field of stabilization and control of - 3, 778
Polymer chains, conformations of - grafted to an impermeable plane surface 9, 2165
Polymer chains, mechanism of conformation change-overs in - 6, 1529
Polymer chains, orientation ordering in solutions of - with rotational-isomeric mechanism of flexibility 5, 1230
Polymer chains, study of the conformational elasticity of - based on the Monte Carlo method 7, 1747
Polymer dielectrics, role of charged particles and relaxation phenomena in the course of mechanical disurption of - in a strong electric field 4, 838
Polymer film formation, influence of the electrode potential and of solvents on the process of - during the electrochemically initiated polymerization of methacrylatemethyldiethoxymethyl silane 9, 2188
Polymer films, electrochemical preparation of - on metals from aqueous solutions of acrylamide and formaldehyde 8, 1980
Polymer layers, formation of quasi-stable radical pairs exchanging an oxygen molecule in - 7, 1617
Polymer material, problems of increasing the strength of -. Review 5, 1037
Polymer matrices, study of the mobility of low molecular weight compounds in various - using the fluorescence method 4, 1020

Polymer melts, influence of the defective boundary layer on nucleation during crystallization of oriented - **2,** 294
Polymer melts, study of the rheological properties of - under hydrostatic pressure **10,** 2470
Polymer membranes, experimental study of mass transfer of some model and drug substances across microporous - in aqueous solutions **4,** 830
Polymer networks, local concentration of units and molecular mobility in swollen - **9,** 2128
Polymer networks, on relations between the refractive indices of epoxy - and their chemical structure **7,** 1702
Polymer–polymer systems, consideration of instrumental expansion in order to restore concentration profiles using electron-probe microanalysis in - **3,** 766
Polymer products, supramolecular structure of - **6,** 1318
Polymer solution, on the interaction of colloidal particles in a - **8,** 1971
Polymer solutions, spontaneous gelation of - **3,** 741
Polymer solutions, use of modulation of elliptic light polarization for the study of electric birefringence of - in pulse fields **6,** 1541
Polymer spectroscopy, VI European conference on - **3,** 780
Polymer substrate, analysis of the distribution of graft polymer in a - by IR spectroscopy **6,** 1539
Polymeric and dimeric compounds, calculation of excess entropy of mixing of low molecular weight compounds with melts of heterochain - and the entropy contribution of macromolecules in the liquid **1,** 98
Polymeric gels, the PMR line shape in crosslinked - **12,** 3039
Polymeric heterocyclic amines, structure and properties of polyelectrolyte complexes of polyacrylic acid and - **11,** 2796
Polymeric hydroxyazophenyl acetylene dyes, study of acidic-basic properties of - with the help of electronic absorption spectra **2,** 452
Polymeric ligands, characteristics of binding of metal ions with - **1,** 81
Polymeric materials, the accumulation of volume charges in - during irradiation by low energy electrons under vacuum **5,** 1206
Polymeric monolayer, computer simulation of the interaction of colloidal particles covered by an oriented - **12,** 3024
Polymeric peroxide, solution polymerization of styrene in the presence of - **7,** 1708
Polymeric sorbents, study of the structure of - **5,** 1179
Polymerization, advances in coordination-ionic - **6,** 1297
Polymerization, analysis of the kinetics and mechanism of - of N,N′-4,4′-diphenylmethane-bis-maleimide and 4,4′-diaminodiphenylmethane **2,** 404
Polymerization, analysis of the special aspects of the kinetic scheme of radical - of methyl methacrylate for high degrees of monomer conversion **1,** 49
Polymerization, cationic - of *dl*-lactide **6,** 1491
Polymerization, chain transfer reactions by aliphatic mercaptans in the high-temperature - of methylmethacrylate **10,** 2414
Polymerization, effect of conditions of - on kinetic regularities of thermal degradation of crosslinked polyether methacrylates **4,** 1013
Polymerization, effect of grafting the initiator to a solid phase on the elementary reactions in radical - **4,** 883
Polymerization, effect of the conditions of synthesis of polymethylmethacrylate on the heat of - **2,** 350
Polymerization, formation of secondary structure in bulk polymer from heterophase - of vinyl chloride **11,** 2852
Polymerization in the butadiene–styrene system under the action of organolithium active sites in the presence of subcatalytic quantities of tetramethylenediamine **10,** 2464

Polymerization, influence of the electrode potential and of solvents on the process of polymer film formation during the electrochemically initiated - of methacrylatemethyldiethoxymethyl silane 9, 2188
Polymerization, investigation of the layered - process 12, 3008
Polymerization, ionic - of heterocycles. Review 7, 1551
Polymerization, kinetic features of radical - of monomers of N,N-dialkyl-N,N-diallylammonium chloride series 3, 748
Polymerization, kinetic features of the - of styrene adsorbed on kaolin 11, 2764
Polymerization, kinetics of oxidative - inhibited by antioxidants. Limiting concentrations of antioxidants, critical rate initiation and critical concentration of monomer 2, 282
Polymerization, limitation of the growing chain during - of isobutylene in the presence of methyl benzenes 2, 257
Polymerization, mechanism of initiation of - of vinyl monomers by manganese (III) tris-acetyl acetonate–carboxylic acid systems in anaqueous medium 5, 1074
Polymerization, mechanism of the inhibition of - of vinyl monomers initiated by benzoyl peroxide by stable nitroxide radicals 10, 2497
Polymerization, method for determining parameters of initiation of radical - 9, 2336
Polymerization, 2-methylenespiro-orthoesters in - and copolymerization reactions 4, 857
Polymerization, microphasic structure of oligoesteracrylate networks obtained in a medium of different solvents by the mechanism of anionic - 10, 2395
Polymerization, molecular weight distribution and topological features of some systems of emulsion - 2, 426
Polymerization, molecular weight distribution in "live" - complicated by rheokinetic effects 2, 503
Polymerization, molecular weight distribution of the products of regulated - on catalysts containing two types of mutually transforming active centres 2, 303
Polymerization of complexes of ethyleneimine and its derivatives and properties of the complexes obtained 8, 2005
Polymerization of styrene and isoprene initiated by oligoperoxides containing perester and diacyl peroxide groups 9, 2138
Polymerization, on the - mechanism of 10-vinylphenothiazine in the presence of tetrahalobenzoquinones in benzene 9, 2203
Polymerization, on the - of fluorine substituted derivatives of benzene in a glow discharge 5, 1215
Polymerization, on the termination mechanism in the radical - of methyl methacrylate at high conversions 10, 2528
Polymerization, radiation-induced ionic - at low temperatures. Cyclopentadiene in a butyl chloride glassy matrix 4, 953
Polymerization, radiation - of vinylchloride in a perfluoralkane glassy matrix 8, 1921
Polymerization, rheological study of the mechanism of gel-effect in radical - of butyl methacrylate in bulk 11, 2826
Polymerization, ring opening - of cyclooctene by catalysts based on tungsten hexachloride and polyisobutylalumoxanes 6, 1408
Polymerization, role of hydroxyl-containing compounds in processes of cationic - of *dl*-lactide 7, 1788
Polymerization, solution - of styrene in the presence of polymeric peroxide 7, 1708
Polymerization, stereoselectivity of - of cyclo-octene with ring opening under the influence of complex catalysts based on WCL_6 4, 798

Polymerization, structure and properties of polybutyl methacrylate obtained by - in the presence of aerosil 6, 1484
Polymerization, study of kinetics and the mechanism of graft - of dimethylaminoethyl methacrylate on polycaproamide in the presence of reversible initiating systems 5, 1271
Polymerization, study of - of 1,1-dimethylallene by the action of bis-π-allylnickel bromide 9, 2265
Polymerization, study of the initiation mechanism of post-radiation graft - of vinyl monomers on solid inorganic materials 2, 495
Polymerization, study of the radiation induced - of epichlorohydrin in the presence of diphenyliodonium boron fluoride 7, 1741
Polymerization, the inhibitive action of carbon monoxide during ethylene - of homogeneous complex catalysts 3, 714
Polymerization, the - of aminoesters and their salts in various solvents 1, 106
Polymerization, the relative roles of physical and chemical deactivation of propagating chains during the anionic - of acrylonitrile in a hydrocarbon medium 9, 2285
Polymerization, the solid phase - of 1,4-bis-(*m*-acetylamine phenyl) butadiyne and the optical and photooptical properties of the polymer 9, 2290
Polymerization, the study of photo-initiated graft - of vinyl monomers of inorganic materials 9, 2314
Polymerization, thermodynamics of pentadecanolactone, of the process of its - and of the resultant polypentadecanolactone in the 0–400 K region 8, 1951
Polymerizations, study of features of lactam - initiated by transition metal oxides 12, 3032
Polymers, a comparison of the relation of reactivities to stress in - and model cycloparaffins 3, 655
Polymers, a study of the regularities in viscoelastic behaviour of heat-resistant - under conditions of creep, exemplified by polybenzoxazole 7, 1659
Polymers, acoustic and viscoelastic relaxation in solutions of some - 5, 1132
Polymers, adsorption of proteins in the processes of intrachain - with blood and model solutions 3, 532
Polymers, I All-Union school-seminar on medicinal - 5, 1286
Polymers, 1-st All-Union symposium on liquid-crystalline - 7, 1808
Polymers, applicability of the method of the photochemical after-effect to studying oxidation of - 1, 253
Polymers, calculation of the glass transition temperature of network - and determination of the chain fragment between crosslinks 1, 64
Polymers, XV Colloquium of countries along the Danube on natural and artificial ageing of - 4, 1034
Polymers, concentration dependency of the light-protective effectiveness of antioxidants in - 6, 1400
Polymers, VI conference of the problem of ageing and stabilization of - 12, 3064
Polymers, distribution of mechanoemission centres on the surface of strained - 12, 3047
Polymers, effect of tensile stress on the molecular mobility of oriented amorphous-crystalline - 11, 2845
Polymers, evaluation of the mechanical serviceability of - according to data of non-isothermal stress relaxation using the method of deformation difference 10, 2593
Polymers, heterogeneous non-isothermal crystallization of - 11, 2839
Polymers, influence of length of the aliphatic group on the character of liquid-crystalline orderliness in - with phenyl benzoate side groups 4, 789
Polymers, influence of temperature on domain structuring in segmented urethane - 9, 2120

Polymers, influence of the mode of carbon black distribution on the electrical conductivity of the binary blend of - **7,** 1714
Polymers, intensification of the final stage of polycondensation during synthesis of linear - **3,** 582
Polymers, IR spectroscopic study of mechanochemical processes in - stimulated by orientation stretching **4,** 816
Polymers, kinetic features of the synthesis of - with terminal functional groups in the presence of redox systems **5,** 1111
Polymers, link between low frequency skeletal vibrations in glassy - and equilibrium rigidity of macromolecules **7,** 1597
Polymers, liquid crystalline state of - with rigid and flexible portions alternating along the chain **12,** 2926
Polymers, method of analysing gel-chromatographic curves of - and study of the mechanism of radical copolymerization of isoprene with acrylonitrile **7,** 1805
Polymers, methods of crosslinking unsaturated carborane-containing - and a study of the properties of their copolymers **5,** 1143
Polymers, microcalorimetric type DSM-2M for use in the study of - **12,** 3053
Polymers, molecular properties and phase conditions of - with mesogenic groups in the main chain **5,** 1253
Polymers, molecular structure and physical properties of rigid chain - in solution. Review **8,** 1815
Polymers, relations between the thermal stability of partially fluorinated - and their structure **12,** 2995
Polymers, relaxation spectrometry of - and the activity of fillers **6,** 1370
Polymers, secondary reactions of aminolysis and ring formation taking place with the formation of crosslinked - from diglycidyl ethers of dicarboxylic acids and aromatic diamines **2,** 479
Polymers, selectivity of gas permeability of - **1,** 33
Polymers, structure of densely corsslinked - of dimethacrylates and oligo-*p*-methacrylates **9,** 2111
Polymers, structure of network - based on oligoisoprene dihydrazides and an epoxide oligomers **5,** 1064
Polymers, study of epoxide - based on resorcinol diglycidyl ether modified by low-molecular weight rubber **12,** 2947
Polymers, study of regularities of the visco-elastic behaviour of heat-resistant - (polyoxadiazole and polyimide) **1,** 236
Polymers, study of the formation of epoxy-containing oligomers and network - . Model reactions of phenols with glycidyl ethers catalyzed by aliphatic and hetero-aromatic amines **4,** 1002
Polymers, study of the molecular weight distribution of boron-siloxane - by gel permeation chromatography **1,** 1
Polymers, synthesis and properties of hydrolyzed - of maleic anhydride **9,** 2254
Polymers, synthesis and properties of sulphur-containing oligodiamines and epoxide - on their basis **6,** 1523
Polymers, synthesis and structure of organotin - **10,** 2389
Polymers, the diffusional regime in the initiated oxidation of - **6,** 1384
Polymers, the structural features of smectic ordering in - with an acrylate and methacrylate main chain **3,** 614
Polymers, the synthesis of heterofunctional - with peroxide and anhydride groups **5,** 1152

Polymers, thermotropic liquid crystalline - in electric and magnetic fields. Review **12,** 2863
Polymetaphenylene isophthalamide, the molecular structure of - solutions **4,** 861
Polymethylmethacrylate, effect of the conditions of synthesis of - on the heat of polymerization **2,** 350
Polymethylmethacrylate, investigation of polystyrene– - block-copolymers by high-efficiency gel-permeation chromatography **12,** 2977
Polymethyl methacrylate, on the photochemical decay of anthracene dimers in a study of microvoids in solid - **10,** 2520
Poly(methyl)methacrylate molecules, conformations and dipole moments of - **1,** 143
Polymethyl methacrylates, intermolecular sequences of stereospecific sequences of - **1,** 154
Poly-4-methylpent-1-ene, comparative study of kinetics of thermo-oxidative degradation of - and polypropylene (isotropic and oriented films) **4,** 967
Poly-4-methylpent-1-ene, effect of γ-radiation on - **2,** 446
Poly-α-methylstyrene, spectroturbidimetric determination of the molecular weight distribution of - **5,** 1279
Poly-α-methylstyrene solutions, flow birefringence and orientation angles in - **8,** 1890
Poly-2-methyl-N-vinylimidazole, conformational properties of - **10,** 2448
Polynaphthoylene benzimidazoles, study of reactions of solid-phase thermal polycyclodehydration in stepwise synthesis of - **3,** 735
Polynucleotide, interaction of a protamine– - insoluble complex with polyphosphates **1,** 196
Polyolefin films, structure of thin - obtained by quenching of the melt down to 77 K **11,** 2750
Polyolefins, effect of chemical structure of liquid media on microcrack formation in crystalline - undergoing deformation **3,** 755
Polyorganosiloxanes, synthesis and properties of - containing 1,7-bis-(dimethylsilylmethyl)-*m*-carborane units **6,** 1454
Polyoxadiazole, study of regularities of the visco-elastic behaviour of heat- resistant polymers (- and polyimide) **1,** 236
Polyoxyethylene glycols, the complexing of oligomeric - of various molecular weight with copper β-diketonates **11,** 2696
Polyoxypropylene glycols, kinetics of the reactions of isocyanates with - **6,** 1351
Polyoxypropylene glycols, study of the formation of linear polyurethanes using - **10,** 2535
Polypentadecanolactone, thermodynamics of pentadecanolactone, of the process of its polymerization and of the resultant - in the 0–400 K region **8,** 1951
Polyphenylquinoxalines, study of the formation of - by gel-permeation chromatography **2,** 463
Poly(N,N′-bis-phenoxyphenyl)pyromellitimide, absorption and luminescence spectra of - , the initial polyamic acid and some model compounds **5,** 1264
Polyphosphates, interaction of a protamine–polynucleotide insoluble complex with - **1,** 196
Polyphthalocyanines, the influence of high pressure and shear strains on some electrophysical properties of - **3,** 647
Polypropylene, breakdown mechanism of stressed - in oxidizing medium. Structural effects **10,** 2542
Polypropylene, comparative study of kinetics of thermo-oxidative degradation of poly-4-methylpent-1-ene and - (isotropic and oriented films) **4,** 967

Polypropylene, homogenization of - –polyethylene mixtures under high pressure and in shear deformation in the presence of acrylamide 1, 174
Polypropylene, kinetic patterns of the disruption of macromolecules in - under load 10, 2361
Polypropylene, principal possibility of strength reinforcement of - during uniaxial elongation in an oxidizing medium 8, 2029
Polypropylene, special features of atactic - synthesized using various catalytic systems based on $TiCl_3$ 8, 2019
Polypropylene, the effect of annealing on the mechanism of plastic deformation of oriented - 3, 692
Polypropylene, thermooxidative stability of - under the simultaneous action of high pressure and shear deformation 3, 679
Polypropylene fibres, method of studying diamagnetic anisotropy of - 7, 1801
Polypropylene shrinkage fibres, modification of non-stretched - by addition of micro-quantities of stearates and lightly dispersed pigment 8, 2055
Polypyromellitimides, the thermal stability of sulphur-containing - 5, 1127
Polysilicic acid sols, study of the interaction of poly-N,N′-diethylaminoethyl methacrylate with - 7, 1605
Polystyrene, influence of the parameters of the rubber phase on the viscous properties of high impact - 12, 2918
Polystyrene, investigation of - –polybutadiene block-copolymers by gel-permeation chromatography and by ozonolysis 12, 2986
Polystyrene, investigation of - –polymethylmethacrylate block-copolymers by high-efficiency gel-permeation chromatography 12, 2977
Polystyrene, kinetic regularities of decomposition of benzoyl peroxide in - medium 6, 1504
Polystyrene, molecular characteristics of graft copolymers of cellulose diacetate and - 6, 1364
Polystyrene, rheological properties of the materials based on - modified with block copolymers of butadiene and styrene under conditions of shear and uniaxial stretching 1, 181
Polystyrene aminodiacetic acid, dielectric polarization on hydration of crosslinked - 8, 1845
Polystyrene solutions, flotation of - in chloroform 8, 2069
Polysulphone, molecular and hydrodynamic characteristics of an aromatic - obtained by electrophilic substitution 10, 2375
Polysulphone, physico-mechanical properties of polyarylate–polybutadiene and - –polybutadiene block copolymers 10, 2561
Polysulphone, sorption, structure and thermodynamic stability of - –polybutadiene block copolymers 10, 2571
Polysulphone, study of molecular weight characteristics of - by gel chromatography 2, 438
Polytetrafluoroethylene, study of recrystallization processes during isometric annealing of oriented - 10, 2554
Polyunsaturated macromolecules, modelling of the structure of - 3, 629
Polyunsaturated molecules, a conformational analysis of - in solution. Continuum model 3, 638
Polyurethane elastomers, study of branched oligoesters and crosslinked - by the NMR method 2, 264
Polyurethane elastomers, thermoelastic properties of - 2, 341
Polyurethane-urea elastomers, segmental orientation during deformation of - 1, 123
Polyurethanes, certain optical properties of pseudoencapsulated cholesteric films based on - 11, 2641
Polyurethanes, study of the formation of linear - using polyoxypropylene glycols 10, 2535

Polyurethanes, viscometry and kinetics of initial stages of curing - **9,** 2270
Polyvinyl alcohol, the thermodynamics of formation of polycomplexes of polyacrylic acid with - and polyethylene oxide **7,** 1631
Polyvinyl alcohol surgical thread, degradation of - **10,** 2418
Polyvinylbenzylamine, linear and crosslinked - and certain of its physico-chemical properties **8,** 1927
Polyvinylbenzylamine, nitrogen and phosphorus-containing polyampholytes based on - **11,** 2705
Poly-*p*-vinylbenzyl ester, synthesis and properties of - of 2,5,7-trinitrofluorenone-4-carboxylic acid **6,** 1519
Polyvinyl chloride, calculation of the microstructure of products of homogeneous chlorination of - **6,** 1356
Polyvinyl chloride, diffusion in - –oligoetheracrylate systems **1,** 190
Polyvinyl chloride, effect of tetrahydrofuran on radiation-induced and thermal oxidation of - **3,** 775
Polyvinylchloride, inhibition of macromolecular crosslinking during the degradation of - **4,** 850
Polyvinyl chloride, kinetics of chemical stabilization of - **8,** 1835
Polyvinylchloride, sorption of water and phase structure of - –plasticizer and oligoesteracrylate systems **5,** 1240
Polyvinylchloride, the heat of interaction of - with plasticizers, the kinetics of swelling and phase equilibrium **7,** 1668
Polyvinylchloride, the structure of the aged layer in - photodegraded in the presence of oxygen **1,** 91
Polyvinyl chloride, thermodegradation of - in presence of 2,2′-di-1,6,7-trihydroxyl-3-methyl-5-isopropyl-8-aldehydonaphthyl **4,** 823
Polyvinylchloride, thermostabilization of - by bifunctional compounds **10,** 2504
Polyvinylidene fluoride, role of end groups in - **10,** 2490
Polyvinylidene fluoride, sensitization of radiation-chemical crosslinking of - by N,N′-*m*-phenylene dimaleimide **12,** 2935
Polyvinyltrimethylsilane, compositional inhomogeneity and other molecular characteristics of chlorinated - **2,** 379
Post-radiation graft polymerization, study of the initiation mechanism of - of vinyl monomers on solid inorganic materials **2,** 495
Porous adsorbent, adsorption of oligomers containing functional groups on a - **6,** 1414
Porous silicas, influence of the polyelectrolyte nature of lignins and lignocarbohydrate complexes on their elution behaviour during exclusion liquid chromatography on - in N,N-dimethyl formamide **4,** 783
Prepolymers, influence of the branching of isocyanate - on their rheological properties **11,** 2758
Pressure, dependence on - of the diffusion coefficients of low molecular weight particles in a polymer **11,** 2664
Pressure, effect of - on molecular dynamics of spin probes in polyethylene **4,** 977
Pressure, the influence of - on nucleation during crystallization from the melt of oligoesters of various molecular weights **7,** 1639
Propagating chains, the relative roles of physical and chemical deactivation of - during the anionic polymerization of acrylonitrile in a hydrocarbon medium **9,** 2285
Protamine, interaction of a - –polynucleotide insoluble complex with polyphosphates **1,** 196
Protein molecules, interaction of - with a network polyelectrolyte in solution **8,** 1850

Proteins, adsorption of - in the processes of interaction of polymers with blood and model solutions 3, 523
Proteins, some features of the bonding of - to carboxylic macronetwork resins 12, 3001
Pulse fields, use of modulation of elliptic light polarization for the study of electric birefringence of polymer solutions in - 6, 1541
Pyrolysis, kinetics and mechanism of high-temperature - of polyacrylonitrile 4, 958

Quenching, structure in thin polyolefin films obtained by - of the melt down to 77 K 11, 2750
Quantum-chemical calculation of intermolecular interaction in poly-(4′4′-dipheny-lene)pyromellitimide 2, 320

γ-Radiation, effect of - on poly-4-methylpent-1-ene 2, 446
Radiation, network formation on - three-dimensional copolymerization of α,ω-di-butyl-bis-maleate triethylene glycol with styrene 9, 2097
Radiation-chemical crosslinking, sensitization of - of polyvinylidene fluoride by N,N′-*m*-phenylene dimaleimide 12, 2935
Radiation grafting, mechanism of - of methyl-α-fluoroacrylate and α,β,β-trifluoro-styrene to a perfluorinated copolymer 4, 946
Radiation-induced and thermal oxidation, effect of tetrahydrofuran on - of polyvinyl chloride 3, 775
Radiation-induced ionic polymerization at low temperatures. Cyclopentadiene in a butyl chloride glassy matrix 4, 953
Radiation induced oxidation, on the influence of dispersed oxides on the - of poly-ethylene 10, 2485
Radiation induced polymerization, study of the - of epichlorohydrin in the presence of diphenyliodonium boron fluoride 7, 1741
Radiation polymerization of vinylchloride in a perfluoralkane glassy matrix 8, 1921
Radical copolymerization, complex formation in the - of some vinyl ketones with maleic anhydride 7, 1723
Radical copolymerization, method of analysing gel-chromatographic curves of polymers and study of the mechanism of - of isoprene with acrylonitrile 7, 1805
Radical pairs, formation of quasi-stable - exchanging an oxygen molecule in polymer layers 7, 1617
Radical polymerization, analysis of the special aspects of the kinetic scheme of - of methyl methacrylate for high degrees of monomer conversion 1, 49
Radical polymerization, effect of grafting the initiator to a solid phase on the ele-mentary reactions in - 4, 883
Radical polymerization, kinetic features of - of monomers of N,N-dialkyl-N,N-diallylammonium chloride series 3, 748
Radical polymerization, method for determining parameters of initiation of - 9, 2336
Radical polymerization, rheological study of the mechanism of gel-effect in - of butyl methacrylate in bulk 11, 2826
Radiochemical and thermochemical curve, the - of compositions based on α-oxides 5, 1121
Radiothermoluminescence, effect of hexane on the - of polyethylene 5, 1081
Reactivities, a comparison of the relation of - to stress in polymers and model cycloparaffins 3, 655
Reactivity of functional groups of nitrate esters of cellulose in the presence of Lewis acids 9, 2144

Recrystallization processes, study of - during isometric annealing of oriented polytetrafluoroethylene **10,** 2554
Recrystallized polychloroprene, on the multiplicity of relaxation processes of - **8,** 1987
Redox systems, kinetic features of the synthesis of polymers with terminal functional groups in the presence of - **5,** 1111
Refractive indices, on relations between the - of epoxy polymer networks and their chemical structure **7,** 1702
Refractometric determination, on - of the properties of boundary layer of elastomers **9,** 2197
Relaxation, evaluation of the mechanical serviceability of polymers according to data of non-isothermal stress - using the method of deformation difference **10,** 2593
Relaxation, molecular movement and magnetic - of ^{13}C-nuclei of organic ions in the ion exchange resin phase **11,** 2655
Relaxation phenomena, role of charged particles and - in the course of mechanical disruption of polymer dielectrics in a strong electric field **4,** 838
Relaxation processes, on the multiplicity of - of recrystallized polychloroprene **8,** 1987
Relaxation properties, study of the - of elastomers using a diffusion method **8,** 2011
Relaxation spectra, influence of the dispersion of active fillers on the fine structure of the - of elastomers **4,** 923
Relaxation spectrometry of polymers and the activity of fillers **6,** 1370
Relaxation transitions, multiplicity of - in butadiene–methylstyrene copolymers **2,** 358
Relaxation transitions, on the high temperature - in *cis*-1,4-polyisoprene **2,** 388
Relaxation transitions, the effect of the filler on - in butadiene-methylstyrene copolymer **3,** 595
Repolyamidation, on the kinetics of the reversible - of polycaproamide below the melting point of the polymer **5,** 1222
Resins, analysis of molecular weight distribution of bis-phenol epoxide - by liquid adsorption chromatography **1,** 247
Resins, some features of the bonding of proteins to carboxylic macronetwork - **12,** 3001
Resins, thermodynamic properties of blends of synthetic - with SKI-3 rubber **2,** 367
Resorcinol, study of epoxide polymers based on - diglycidyl ether modified by low-molecular weight rubber **12,** 2947
Rheokinetic effects, molecular weight distribution in "live" polymerization complicated by - **2,** 503
Rheological behaviour of melts of a thermotropic mesomorphous polyester **10,** 2455
Rheological properties, influence of the branching of isosyanate prepolymers on their - **11,** 2758
Rheological properties of electrically controlled organosilicon gels **11,** 2780
Rheological properties of the materials based on polystyrene modified with block copolymers of butadiene and styrene under conditions of shear and uniaxial stretching **1,** 181
Rheological properties, study of the - of polymer melts under hydrostatic pressure **10,** 2470
Rheological study of the mechanism of gel-effect in radical polymerization of butyl methacrylate in bulk **11,** 2826
Rigid chain polymers, molecular structure and physical properties of - in solution. Review **8,** 1815
Ring formation, secondary reactions of aminolysis and - taking place with the formation of crosslinked polymers from diglycidyl ethers of dicarboxylic acids and aromatic diamines **2,** 479
Rotational-isomeric mechanism, orientation ordering in solutions of polymer chains with - of flexibility **5,** 1230

Rubber, study of epoxide polymers based on resorcinol diglycidyl ether modified by low-molecular weight - 12, 2947
Rubber, the mechanism of formation of phase structure of epoxide– - systems 9, 2305
Rubber, thermodynamic properties of blends of synthetic resins with SKI-3 - 2, 367
Rubber dispersions, mechanism of increasing the impact strength of plastics using - 4, 985
Rubber phase, influence of the parameters of the - on the viscous properties of high impact polystyrene 12, 2918
Rubber vulcanization accelerators, synthesis and mechanism of the action of phosphorus-containing - 1, 19
Rubbers, effect of deformation during crosslinking on elastic properties of - 1, 204
Rubbers, hydrophosphorylation of synthetic - 2, 472

Salt vulcanization, mechanism of action of triethanolamide trimethacrylate during - of elastomers with reactive ester groups 6, 1345
Salts, the polymerization of aminoesters and their - in various solvents 1, 106
Secondary reactions occurring on cometathesis of cyclo-octadiene-1,5 and α-olefines in presence of the catalyst $W(OR)_2Cl_4$–$Al_2(iso\text{-}Bu)_3Cl_3$ 10, 2370
Secondary reactions of aminolysis and ring formation taking place with the formation of crosslinked polymers from diglycidyl ethers of dicarboxylic acids and aromatic diamines 2, 479
Secondary structure, formation of - in bulk polymer from heterophase polymerization of vinyl chloride 11, 2852
Sedimentation velocity of dilute and moderately concentrated solutions of cellulose nitrate 5, 1173
Self-diffusion, aspects of - of solvent in polymer–low molecular weight substance system 8, 1883
Shear and uniaxial stretching, rheological properties of the materials based on polystyrene modified with block copolymers of butadiene and styrene under conditions of - 1, 181
Shear deformation, homogenization of polypropylene–polyethylene mixtures under high pressure and in - in the presence of acrylamide 1, 174
Shear deformation, thermooxidative stability of polypropylene under the simultaneous action of high pressure and - 3, 679
Shear strain, structural-mechanical features of two-stage - of oriented low density polyethylene 3, 621
Shear strains, the influence of high pressure and - on some electrophysical properties of polyphthalocyanines 3, 647
Shrinkage, the molecular mechanism of - of polyethylene terephthalate 3, 672
Silica, separation of mixtures of high-molecular weight compounds by chromatography using - with grafted glycol groups 8, 2074
Silicon atom, anionic non-equilibrium copolymerization of hexaorganylcyclotrisiloxanes with polar substituents at the - 12, 2899
Silicon atom, crosslinking of polydimethylvinylsiloxane rubber by oligoorganosilane with functional groups at the - 5, 1192
Silicon-containing polyacrylates, effect of steric factors on the possibility of thermal rearrangement in side groups of - 9, 2230
Siloxane rubbers, the effect of an aerosil on melting and crystallization of unvulcanized blends and vulcanizates based on the - , SKTFV 3, 603
Smecting ordering, the structural features of - in polymers with an acrylate and methacrylate main chain 3, 614

$SnCl_4$, effect of electron-donor compounds on the copolymerization of styrene and its derivatives in the presence of - and $TiCl_4$ 4, 877
Solid organic substances, tunnel mechanism of microdiffusion of free radicals in - 11, 2769
Solid phase, effect of grafting the initiator to a - on the elementary reactions in radical polymerization 4, 883
Solid-phase polycondensation, formation of morphological structures in ladder type polyheteroarylenes synthesized by - 3, 727
Solid-phase thermal polycyclodehydration, study of reactions of - in stepwise synthesis of polynaphthoylene benzimidazoles 3, 739
Solvent, aspects of self-diffusion of - in polymer–low molecular weight substance system 8, 1883
Solvent, concerning the conformation of an aromatic polyamide in an organic - and in concentrated sulphuric acid according to flow-birefringence data 8, 1906
Solvent, effect of surface tension of the - on the duration of the induction period of diffusion in the methanol–PMMA system 8, 1878
Solvent, generalized polymer– - phase diagram 3, 573
Solvents, influence of the electrode potential and of - on the process of polymer film formation during the electrochemically initiated polymerization of methacrylatemethyldiethoxymethyl silane 9, 2188
Solvents, microphasic structure of oligoesteracrylate network obtained in a medium of different - by the mechanism of anionic polymerization 10, 2395
Solvents, the polymerization of aminoesters and their salts in various - 1, 106
Sorption, effect of chemical structure of aromatic polyamides on - capacity towards ammonia 9, 2236
Sorption, mechanism of - and mass transfer of sulphur dioxide 10, 2405
Sorption of water and phase structure of polyvinylchloride–plasticizer and oligoesteracrylate systems 5, 1240
Sorption, structure and thermodynamic stability of polysulphone–polybutadiene block copolymers 10, 2571
Sorption equilibrium in system with polymer + mixtures of three solvents 12, 2941
Spectroscopy, VI European conference on polymer - 3, 780
Spectrometry, relaxation - of polymers and the activity of fillers 6, 1370
Spectroturbidimetric determination of the molecular weight distribution of poly-α-methylstyrene 5, 1279
Spectroturbidimetric titration, investigation of oligoorganosiloxane based on exclusion liquid chromatography and - 12, 3017
Spin probes, effect of pressure on molecular dynamics of - in polyethylene 4, 977
Spin trap study of the copolymerization of styrene with sulphur dioxide 6, 1425
Stabilizers, the effect of - on the chain photo-oxidation of polyamides under conditions of weak and strong light absorption 4, 897
Stearates, modification of non-stretched polypropylene shrinkage fibres by addition of micro-quantities of - and lightly dispersed pigment 8, 2055
Steric factors, effect of - on the possibility of thermal rearrangement in side groups of silicon-containing polyacrylates 9, 2230
Stereoselectivity of polymerization of cyclo-octene with ring opening under the influence of complex catalysts based on WCL_6 4, 798
Strength, mechanism of increasing the impact - of plastics using rubber dispersions 4, 985
Strength, problems of increasing the - of polymer material. Review 5, 1037
Strength reinforcement, principal possibility of - of polypropylene during uniaxial elongation in an oxidizing medium 8, 2029

Stress, a comparison of the relation of reactivities to - in polymers and model cycloparaffins 3, 655
Stretching, IR spectroscopic study of mechanochemical process in polymers stimulated by orientation - 4, 816
Stretching, rheological properties of the materials based on polystyrene modified with block copolymers of butadiene and styrene under conditions of shear and uniaxial - 1, 181
Stretching, study of the conformational structure of macromolecules under - . Results of the computer simulation and of IR spectroscopy 7, 1756
Stretching, the durability and deformation behaviour of polybutadiene under uniaxial - in liquid media 4, 916
Structural changes in cellulose caused by the action of dichloromethane 7, 1647
Structural features, the - of smectic ordering in polymers with an acrylate and methacrylate main chain 3, 614
Structural-mechanical features of two-stage shear strain of oriented low density polyethylene 3, 621
Structure, the - of the aged layer in polyvinylchloride photodegraded in the presence of oxygen 1, 91
Styrene, chemical inhomogeneity of terpolymers of - with acrylonitrile and methyl methacrylate 6, 1337
Styrene, copolymerization of 1-vinyl-1,2,4-triazole with methyl methacrylate and - 1, 15
Styrene, effect of electron-donor compounds on the copolymerization of - and its derivatives in the presence of $SnCl_4$ and $TiCl_4$ 4, 877
Styrene, hydroxylation of - –diene triblock copolymers in solution and on the surface 2, 489
Styrene, kinetic features of the polymerization of - adsorbed on kaolin 11, 2764
Styrene, kinetic study of the mechanism of chain propagation in alternating copolymerization of - and methyl-α-chloracrylate in the presence of diethylaluminium chloride 11, 2819
Styrene, network formation on radiation three-dimensional copolymerization of α,ω-dibutyl-bis-maleate triethylene glycol with - 9, 2097
Styrene, molecular characteristics of triple copolymers of - with acrylonitrile and methylmethacrylate in dilute solutions 12, 2889
Styrene, polymerization in the butadiene– - system under the action of organolithium active sites in the presence of subcatalytic quantities of tetramethylenediamine 10, 2464
Styrene, polymerization of - and isoprene initiated by oligoperoxides containing perester and diacyl peroxide groups 9, 2138
Styrene, rheological properties of the materials based on polystyrene modified with block copolymers of butadiene and - under conditions of shear and uniaxial stretching 1, 181
Styrene, solution polymerization of - in the presence of polymeric peroxide 7, 1708
Styrene, spin trap study of the copolymerization of - with sulphur dioxide 6, 1425
Styrene, study of epichlorohydrin addition to the copolymer of *p*-benzoquinone and - in the presence of amine catalysts 1, 161
Styrene, study of photoelastic properties of films of - –butadiene ternary block copolymers 7, 1766
Styrene, the behaviour of macromolecules of - –acrylonitrile–methyl methacrylate terpolymers in solutions 9, 2276
Sulphides, some aspects of the anionic copolymerization of cyclic - with hexamethylcyclotrisiloxane 12, 2971

Sulphone, study of comparative characteristics of adhesion strength of epoxide resins based on - and bis-phenol A 8, 2066
Sulphur-containing oligodiamines, synthesis and properties of - and epoxide polymers on their basis 6, 1523
Sulphur-containing polypyromellitimides, the thermal stability of - 5, 1127
Sulphur dioxide, action of - on block copolymers containing polybutadiene and polydimethylsiloxane 2, 275
Sulphur dioxide, mechanism of sorption and mass transfer of - 10, 2405
Sulphur dioxide, spin trap study of the copolymerization of styrene with - 6, 1425
Sulphuric acid, concerning the conformation of an aromatic polyamide in an organic solvent and in concentrated - according to flow-burefringence data 8, 1906
Sulphuric acid, light scattering and viscosity of solutions of poly-*p*-(2-cyanophenylene)terephthalamide in - 3, 685
Supermolecular structure, change in the - of oriented polyethylene in the course of short-term heat treatment above the melting point 4, 892
Supramolecular structure of polymer products 6, 1318
Supramolecular structure of non-oriented polyfluorenepyromellitimide films 2, 311
Supermolecular-structure formation in films prepared from dianhydride of 3,3′,4,4′-diphenyloxide tetracarboxylic acid and various diamines 10, 2433
Surgical thread, degradation of polyvinyl alcohol - 10, 2418
Swelling, the heat of interaction of polyvinylchloride with plasticizers, the kinetics of - and phase equilibrium 7, 1668
Swollen polymer networks, local concentration of units and molecular mobility in - 9, 2128
Synthesis, achievements in the - of reactive hydrocarbon oligomers with terminal functional groups. Review 10, 2341
Synthesis and mechanism of the action of phosphorus-containing rubber vulcanization accelerators 1, 19
Synthesis and properties of certain polycyanoamides 6, 1394
Synthesis and properties of hydrolyzed polymers of maleic anhydride 9, 2254
Synthesis and properties of polylaevoglucosan and some of its derivatives. Review 9, 2085
Synthesis and properties of polyorganosiloxanes containing 1,7-bis-(dimethylsilylmethyl)-*m*-carborane units 6, 1454
Synthesis and properties of poly-*p*-vinylbenzyl ester of 2,5,7-trinitrofluorenone-4-carboxylic acid 6, 1519
Synthesis and properties of sulphur-containing oligodiamines and epoxide polymers on their basis 6, 1523
Synthesis and structure of organotin polymers 10, 2389
Synthesis and study of the properties of aromatic fluorine-containing copolyamides 2, 328
Synthesis and thermal properties of reactive polychloro(diphenylenesulphides) 8, 2049
Synthesis, effect of the conditions of - of polymethylmethacrylate on the heat of polymerization 2, 350
Synthesis, intensification of the final stage of polycondensation during - of linear polymers 3, 582
Synthesis, kinetic features of the - of polymers with terminal functional groups in the presence of redox systems 5, 1111
Synthesis of alternating and random copolymers of ethylene with maleic anhydride 9, 2151
Synthesis of copolymers containing 2,5,7-trinitrofluorenone fragments by modification of polyepichlorohydrin 9, 2161
Synthesis of polyarylates with norbornylene rings in the chain 8, 2039
Synthesis of vinyl oligoesters 10, 2477

Synthesis, study of reactions of solid-phase thermal polycyclodehydration in stepwise - of polynaphthoylene benzimidazoles **3,** 735
Synthesis, the - and study of unsaturated polyamides **11,** 2728
Synthesis, the - of heterofunctional polymers with peroxide and anhydride groups **5,** 1152
Synthesis, the use of organomagnesium compounds and alkyl-aluminium-magnesium complexes in a Ziegler catalyst for the - of *cis*-1,4-polyisoprene **10,** 2442
Synthetic polyacids, oligomeric ionenes and their reactions with - **6,** 1436
Synthetic resins, thermodynamic properties of blends of - with SKI-3 rubber **2,** 376
Synthetic rubbers, hydrophosphorylation of - **2,** 472

Telomerization of ethylene by the system $TiCl_4$–$(C_2H_5)_{1.5}AlCl_{1.5}$–sec-$C_8H_{17}Cl$ **9,** 2180
Temperature, influence of loading and change in - on the parameters of the crystalline lattice of polycaproamide **1,** 42
Temperature dependence of the amplitude of longitudinal vibrations of the lattice of large polyethylene crystallites **1,** 7
Tensile stress, effect of - on the molecular mobility of oriented amorphous-crystalline polymers **11,** 2845
Tension, effect of surface - of the solvent on the duration of the induction period of diffusion in the methanol–PMMA system **8,** 1878
Terminal functional groups, achievements in the synthesis of reactive hydrocarbon oligomers with - **10,** 2341
Terminal functional groups, kinetic features of the synthesis of polymers with - in the presence of redox systems **5,** 1111
Termination mechanism, on the - in the radical polymerization of methyl methacrylate at high conversions **10,** 2528
Terpolymers, chemical inhomogeneity of - of styrene with acrylonitrile and methyl methacrylate **6,** 1337
Terpolymers, the behaviour of macromolecules of styrene–acrylonitrile–methyl methacrylate - in solutions **9,** 2276
Tetraacetic ethane, polychelates of erbium and ytterbium prepared from - **10,** 2512
Tetrahalobenzoquinones, on the polymerization mechanism of 10-vinylphenothiazine in the presence of - in benzene **9,** 2203
Tetrahydrofuran, effect of - on radiation-induced and thermal oxidation of polyvinyl chloride **3,** 775
Tetramethylenediamine, polymerization of the butadiene–styrene system under the action of organolithium active sites in the presence of subcatalytic quantities of - **10,** 2464
Thermal analysis, calculation method for - **6,** 1546
Thermal and viscoelastic properties, study of the - of phosphorous-containing urethane block copolymers **6,** 1328
Thermal degradation, effect of conditions of polymerization on kinetic regularities of - of crosslinked polyether methacrylates **4,** 1013
Thermal oxidation, effect of tetrahydrofuran on radiation-induced and - of polyvinyl chloride **3,** 775
Thermal polycyclodehydration, study of reactions of solid-phase - in stepwise synthesis of polynaphthoylene benzimidazoles **3,** 735
Thermal properties, synthesis and - of reactive polychloro-(diphenylenesulphides) **8,** 2049
Thermal rearrangement, effect of steric factors on the possibility of - in side groups of silicon-containing polyacrylates **9,** 2230

Thermal stability, influence of defects in the chemical structure of polyimides on their - **8,** 1967
Thermal stability, investigation of the - of an oligoester crystallized in thin interlayers **12,** 2964
Thermal stability, relations between the - of partially fluorinated polymers and their structure **12,** 2995
Thermal stability, the influence of thermal treatment conditions on features of the chemical structure in the imidization of polyamic acids and on the - of the polyimide products **3,** 663
Thermal stability, the - of sulphur-containing polypyromellitimides **5,** 1127
Thermal transformations, study of - of the copolymer of iso- and tetraphthalic acids and diphenylolpropane **6,** 1468
Thermal treatment, the influence of - conditions on features of the chemical structure in the imidization of polyamic acids and on the thermal stability of the polyimide products **3,** 663
Thermochemical cure, the radiochemical and - of compositions based on α-oxides **5,** 1121
Thermodegradation of polyvinyl chloride in presence of 2,2′-di-1,6,7-trihydroxy-3-methyl-5-isopropyl-8-aldehydonaphthyl **4,** 823
Thermodynamic properties of blends of synthetic resins with SKI-3 rubber **2,** 367
Thermodynamic stability, sorption, structure and - of polysulphone–polybutadiene block copolymers **10,** 2571
Thermodynamics of pentadecanolactone, of the process of its polymerization and of the resultant polypentadecanolactone in the 0–400 K region **8,** 1951
Thermodynamics of statistical copolymers of *n*-octyl methacrylate and N-vinyl carbazole **5,** 1055
Thermodynamics, the - of formation of polycomplexes of polyacrylic acid with polyvinyl alcohol and polyethylene oxide **7,** 1631
Thermoelastic properties of polyurethane elastomers **2,** 341
Thermo-oxidative degradation, comparative study of the kinetics of - of poly-4-methylpent-1-ene and polypropylene (isotropic and oriented films) **4,** 967
Thermooxidative degradation, kinetics of the - of *cis*-1,4-polyisoprene in bulk in the presence of phenol antioxidants **5,** 1198
Thermooxidative degradation of compositions based on aromatic polyamides **6,** 1475
Thermooxidative stability of polypropylene under the simultaneous action of high pressure and shear deformation **3,** 679
Thermostabilization of polyvinylchloride of bifunctional compounds **10,** 2504
Thermotropic liquid crystalline polymer, infrared investigation of the orientational properties of a - with side mesogenic groups **3,** 722
Thermotropic liquid crystalline polymers in electric and magnetic fields. Review **12,** 2863
Thermotropic mesomorphous polyester, rheological behaviour of melts of a - **10,** 2455
Thin-layer chromatography, use of - for the study of molecular characteristics of oligoarylates **11,** 2859
$TiCl_3$, special features of atactic polypropylene synthesized using various catalytic systems based on - **8,** 2019
$TiCl_4$, effect of electron-donor compounds on the copolymerization of styrene and its derivatives in the presence of $SnCl_4$ and - **4,** 877
$TiCl_4$–$(C_2H_3)_{1.5}AlCl_{1.5}$–sec-$C_8H_{17}Cl$, telomerization of ethylene by the system - **9,** 2180
Toluene, study of the molecular weight distribution and structure of oligomers prepared by alkylation of - with epichlorohydrin **1,** 129
Topological features, molecular weight distribution and - of some systems of emulsion polymerization **2,** 426

Transition, energy of the hydrothermal - in cellulose diacetate 1, 137
Trans-**polypentenamers,** the molecular characteristics and properties of dilute solutions of - 11, 2721
Triad distribution, methods of evaluating individual kinetic constants of an irreversible polymer-analogue reaction, accompanied by the "neighbour" effect using experimental results of - in reaction products 4, 1026
Triethanolamine trimethacrylate, mechanism of action of - during salt vulcanization of elastomers with reactive ester groups 6, 1345
α,β,β-**Trifluorostyrene,** mechanism of radiation grafting of methyl-α-fluoroacrylate and - to a perfluorinated copolymer 4, 946
1,1,5-Trihydroperfluoroamyl acrylate, dilatometric study of the solution copolymerization of - and methacrylonitrile 12, 3059
2,5,7-Trinitrofluorenone, synthesis of copolymers containing - fragments by modification of polyepichlorohydrin 9, 2161
2,5,7-Trinitrofluorenone-4-carboxylic acid, synthesis and properties of poly-*p*-vinylbenzyl ester of - 6, 1519
Trypsin, complexing of - with soluble copolymers based on vinyl pyrrolidone and carboxylic acids 7, 1588
Tungsten hexachloride, ring opening polymerization of cyclooctene by catalysts based on - and polyisobutylalumoxanes 6, 1408
Tunnel mechanism of microdiffusion of free radicals in solid organic substances 11, 2769

Unsaturated carborane-containing polymers, methods of crosslinking - and a study of the properties of their copolymers 5, 1143
Unsaturated polyamides, the synthesis and study of - 11, 2728
Urethane block copolymers, effect of chemical crosslinking on hydrogen bonds in - 9, 2247
Urethane polymers, influence of temperature on domain structuring in segmented - 9, 2120
Urethane block copolymers, study of the thermal and viscoelastic properties of phosphorus-containing - 6, 1328

Vibrations, temperature dependence of the amplitude of longitudinal - of the lattice of large polyethylene crystallites 1, 7
Vinyl chloride, formation of secondary structure in bulk polymer from heterophase polymerization of - 11, 2852
Vinylchloride, radiation polymerization of - in a perfluoralkane glassy matrix 8, 1921
Vinyl-containing organocyclosiloxanes, interaction of diethylphosphite and diethylphosphine oxide with - 2, 420
Vinyl ketones, complex formation in the radical copolymerization of some - with maleic anhydride 7, 1723
Vinyl monomers, mechanism of initiation of polymerization of - by manganese (III) tris-acetyl acetonate–carboxylic acid systems in an aqueous medium 5, 1074
Vinyl monomers, mechanism of the inhibition of polymerization of - initiated by benzoyl peroxide by stable nitroxide radicals 10, 2497
Vinyl monomers, study of the initiation mechanism of post-radiation graft polymerization of - on solid inorganic materials 2, 495
Vinyl monomers, the study of photo-initiated graft polymerization of - inorganic materials 9, 2314
Vinyl oligoesters, synthesis of - 10, 2477

10-Vinylphenothiazine, on the polymerization mechanism of - in the presence of tetrahalobenzoquinones in benzene 9, 2203
Vinyl pyrrolidone, complexing of trypsin with soluble copolymers based on - and carboxylic acids 7, 1588
Vinylidene fluoride, study of the kinetic features of emulsion copolymerization of - with hexafluoropropylene 11, 2714
1-Vinyl-1,2,4-triazole, copolymerization of - with methyl methacrylate and styrene 1, 15
Viscoelastic behaviour, a study of the regularities in - of heat-resistant polymers under conditions of creep, exemplified by polybenzoxazole 7, 1659
Visco-elastic behaviour, study of regularities of the - of heat-resistant polymers (polyoxadiazole and polyimide) 1, 236
Viscoelastic properties, influence of the hydrodynamic interaction on the - of solutions of macromolecules in the high frequency region 5, 1087
Viscoelastic properties, study of the thermal and - of phosphorus-containing urethane block copolymers 6, 1328
Viscoelastic relaxation, acoustic and - in solutions of some polymers 5, 1132
Viscometric properties of dilute solutions of hydrolyzed polyacrylamide 10, 2380
Viscometric study of some structural features of modified polyethylene terephthalate 4, 931
Viscometry and kinetics of initial stages of curing polyurethanes 9, 2270
Viscosity, flow birefringence and - of chitosan solutions in acetic acid of various ionic strengths 7, 1694
Viscosity, light scattering and - of solutions of poly-*p*-(2-cyanophenylene)terephthalamide in sulphuric acid 3, 685
Viscous properties, influence of the parameters of the rubber phase on the - of high impact polystyrene 12, 2918
Vulcanizates, the effect of an aerosil on melting and crystallization of unvulcanized blends and - based on the siloxane rubber, SKTFV 3, 603
Vulcanization accelerators, synthesis and mechanism of the action of phosphorus-containing rubber - 1, 19

Water, role of complex formation during the homo- and copolymerization of methacrylonitrile and acrylic acid in dimethyl sulphoxide– - solutions 7, 1730
WCL_6, stereoselectivity of polymerization of cyclo-octene with ring opening under the influence of complex catalysts based on - 4, 798

X-ray analysis of poly-N-epoxypropylcarbazole 5, 1138
X-ray study, method for preparing samples for the - of oriented flax nitrate fibres 4, 1025

Ytterbium, polychelates of erbium and - prepared from tetraacetyl ethane 10, 2512

Ziegler catalyst, the use of organomagnesium compounds and alkyl-aluminium-magnesium complexes in a - for the synthesis of *cis*-1,4-polyisoprene 10, 2442
